# Mrs. Housewife:-There's a Happy Medium in Everything Anything that is overdone or under-done is not good.

you use the cheap and Big Can Kinds you are getting quantity at the sacrifice of quality. It cannot be as good — or as economical as Calumet—the medium price kind. If you use the High Price Kind, you are paying tribute to the Trust—the quality is no better.

In this can you get more substance but not more baking powder, It is great in quantity onlynot in economynot in satisfaction

Calumet, in the Standard 1 lb. can, sells at a moderate cost-but is great in all round satisfaction. You less of it-it makes the baking lighter. purer - more deli ious, One baking will prove its superiority-try it. Ask Kind Great in price.

Here's the "Full Value" in

your grocer and insist on Calumet. Free large handsome recipe book. Send 4a and slip found in pound can.

## COING AFTER CITY'S DRAW Aged Apple Tree City Comptroller Wants All Coming

on Occupation Tax.

CONSULT OTHER CITIES Segregation of Income Quiside Limits

of Omaha Likely to Be Bone of Contention by the Corporations,

The city comptroller and his staff are anticipating no easy task in ascertaining occupation tax ordinance. The tax began vill be due December 1.

"We propose to avail ourselves experience of other cities," said Deputy Comptroller Cosgrove. "We will get from the cities having similar taws any blanks or forms they may have in use, and also learn their methods of computing and segregating. In Omaha we are entitled to ? per cent on all business, but we cannot get anything from business originating in Benon or Dundee or South Omaha on the lines of the street car company. Then the gas company has a suboffice in South Omaha, but all gas goes from the receiv ers located in this city. So with the electric light and the telephone and water companies-there are various details to be given consideration.

"So far as possible, we want to be pre pared to go about the work in the right way when we start it. Perhaps we should have started action earlier, but the councilmen were up against a new thing, just as we were in this office. I believe we can get in shape to handle the matter right without very much trouble."

Pormer Councilman Zimman, who fathered the occupation tax ordinance, with Councilman Bridges, believes the city should employ a high priced expert accountant by the year, at a salary of something like \$5,000, to devote his attention exclusively to the collection of occupation and royalties that the city may be en titled to from various companies

### CLARKE RACING TO MEMPHIS Omaha's Lone Delegate to Congress of Deep Waterways Men May

Yet Join Ffeet.

Henry T. Clarke, sr., of Omaha, may yet be a guest on the fleet that is carrying President Taft down the Mississippi river to New Orleans. Mr. Clarke received a pressing invitation to join the boat that was unable to leave at that time.

He has since arranged to make the trip to New Orleans and may be able to catch the boats before they reach the end of the trip. In case he overtakes them he will continue his journey with the Taft party, He goes to New Orleans as a delegate to the meeting of the Lakes-to-the-Gulf Deep Waterways congress.

# HOW are such perfect soups possible at the price?

Because price is the last thing we think of. We make Campbell's Soups as good as soups can be made, regardless of price. And in consequence our output is so large that we buy and operate on a large and economical scale.

In one day's making of Campbell's Soups we sometimes use more than 25,000 pounds of choice beef; 21,000 pounds of prime mutton; 12,000 pounds of selected poultry; 18,000 pounds of celery; 10,000 pounds each of salt and sugar; 5,000 pounds of fresh green peas, and many other things in proportion. We have used in a single day 25,000 baskets of tomatoes. We have put up in one day more than 420,000 cans of

Our plant is situated almost in the midst of the famous New Jersey market-gardens; so that we obtain the finest and freshest vegetables, and without heavy freight charges. We pay cash for all our supplies; so that we command the pick of the market, and the most favorable terms. By condensing our soups we save money on cans, boxes, packing, freight, etc. And you do not pay for water.

All our people are experts our chefs, chemists, buyers, kitchen help every one. And there is no pure-food law as strict as we are.

We use no chemicals nor preservatives. Every can of Campbell's soups is sterilized after sealing in a germ-destroying heat of 240 degrees, -the only scientific way. And it opens as sweet and fresh as on the day it was made. We have five artesian wells on our premises piping to bed-rock for pure water. Our kitchen floors are solid cement; and we flood them every night with hot soda and water. All our cauldrons and utensils are regularly scalded and sterilized. The soup goes through glass-lined pipes from the blending kettles to the filling machines. And our patented automatic machinery fills, seals and labels thirty thousand cans of Campbell's Soups in an hour.

These are some of the reasons why we can give you—and do give you—for 10 cents. a can the best soups made anywhere at any price.

But try them and judge for yourself. If not satisfied the grocer returns your money and we pay him. Isn't that the best guarantee?

All he needs is
