Washington of Tuskegee. HIS SCHOOL AND HIS LABORS

Practical Exponent of the Gospel of Self-Help Among the Colored People-Many Obstacles Overcome.

Leadership of a people imposes grave ship is assumed or comes through force of mind and heart. The task of reaching or coming within measurable distance of the various ideals of those who follow becomes the more difficult when the following is of lowly estate with restricted opportunities for advance. Every step must be measured, every move gauged, to determine the ultimate effect.

Circumstances have made Booker T. Washington a recognized leader of the negro race in the United States. Doubtless, if the question was put to him, he would deny the distinction. He pears no written commission as a leader. His credentials are his thirty years of labor as the "guide; philosopher, friend," and teacher of the colored people

Coming Visit to Omaha, Mr. Washington is now on a tour of the west and will be in Omaha during the week. Wherever he goes he sounds the praises of the famous Tuskegee Normal and Industrial que in being the most successful institution of its class in this country. A roster of 1,400 students attests the success achieved through gealous lab ors of the principal.

Gospel of Self-Help. Self-help is the gospel taught in Tuskegee, as it is the gospel that has shaped

the life of Booker Washington. In a series of papers in the Outlook Mr. Washington relates among other things the wide-spread discouragement of the colored people in Alabama and the south generally, follow ing the inauguration of President Garfield in 1881. Disfranchisement was the primary cause of the apathy. A delegate was sent to the national capital to interview the president with a view to securing political rights which they deemed essential to their welfare. The delegate did not see the president, but nevertheless reurned with a report that intensified the gioom. "This incident," he writes, "struck me as the

been cut into all manner of pieces and yet lived to tell the tale. But of late years surgery appears to be on the wane. It is not the success it was supposed to be. While patients lived through new and startling operations, there were comparatively few who were cured. Many lived only for a few monthsand then died of a complication, and others lived their mutilated lives in misery. Now it is the science of medicine that is making giant strides forward and is fast outstripping the knife in curing disease. Among the most progressive apecialists in the new school of medicine are the United Doctors, who have their Omaha institute on the second floor of the Neville block, corner 16th and Harney streets. The United Doctors claim that there is merit in all the old schools of medicine. but that none of them are perfect. By using all the systems, combining Homeopathy, Allopathy and Eclectacism, these a eclalista have formed a new and more perfect system of curing disease which is making many cures in supposedly incurable cases and thereby attracting the attention of the public and the entire medical world. One case in particular is the case of Mrs. Emma Clawson of 929 Chandler St., Danville, Ill. Mrs. Clawson had a pelvio tumor, such as it has always been maintained by medical authorities could not be removed or relieved except by the knife. Under the United Doctors new system of

Danville, Ill., July 27, 1909. For over one year and a half I suffered with a complication of diseases and female trouble. I consulted and was put under treatment by several of the best physicians here but received only temporary relief. I grew worse until I was compelled to give up my regular employment, that of dressmaking, and was told that an operation only, would cure me as a large lump had appeared in my side which the doctors diagonzed as a tumor. I had a horror of operations and so suffered on, growing worse constantly until the 1st of May, this year, when I consulted the United Doctors and began their reatment.

That was but two months and a half ago, and I feel like a different woman. At the end of the first month the lump had entirely disappeared from my side and now I have gained twelve pounds in weight and have made constant improvement in every way.

I have been a resident of Danville for eleven years and take pleasure in speaking of my case to the public, and wish to recommend these specialists to my many friends.
