Higher Price of Feed Boosts Cost of Milk.

Milk drinkers are finding that they cannot have their favorite tipple, even at me, as freely as they used to. With the high price of feed, the closer inspection and an insistent demand for clean cow stables, the dairymen have been quietly, but steadily boosting the price. Fourteen quarts for \$1 is about the very best that any housewife can do today, as against eighteen a few months ago. Milk from special dairies is sold at ever higher rates. Every regulation that we are up against owadays," said one North Omaha dairyman, "means additional expense, like the better and more frequent cleaning of barns. We cannot go ahead hop-scotch like we used to, when the old-time methods vere good enough for everybody. At the old prices we were not making any great amount of money, and at the new prices we only come out about the same. It is the public's funeral, and the public pays the bill, that's all."
