

Bennett's Popular Priced Millinery

No necessity to pay "outlandish" prices for your fall hats. Come over to the Bennett idea and see how very, very much the savings to you really are here.

This millinery keeps forging ahead, rolling up bigger and bigger orders daily through the giving of values not approached in any other place in town—it's an admitted fact, we have a corps of the most efficient designers, whose artistic tastes are shown in the thousand or more pretty hats shown—

\$5.75 - \$10.15

These are our popular lines. They were not planned with a view to securing from you all we could possibly get. They represent savings of \$5 to \$10 each.

We are aiming at an enduring business, and have taken pains to have the prettiest and most fashionable hats that the city can boast and yet keep the prices within reason.

Big Monday Sale Berlin Kettles

First Grade Enamelled Kettles and Sauce Pans at Less Than Factory Cost—One Day Only.

7 1/2 gallon 35c | 8 1/2 gallon 45c
Peninsular Steel Range—\$0.00 saving—A full size 6-hole range, with 18-inch oven and high warming closet, regular price \$39.50, for \$35.00

Advance Steel Range—One of the best Peninsular models, \$28.50 stove, for \$25.00
Peninsular Oak Heaters, \$5.95
Ash Sifters, good ones for \$1.50

ROLLER SKATES
Barney & Berry's ball bearing rollers, \$3.50 kind, for \$2.65
\$1.50 Sidewalk Skates98c

"Quickest Ever" Washing Machine

This is a new lever washer, and, as the name implies, does a large washing in shortest possible time, and does it well. Large, firmly rodded tub. No parts to break. Frequently sells at \$10. Our special price \$6.50

Step Ladders—Six-foot, handy to have about the house, a good \$1.50 ladder, for \$1.00
Curtain Stretchers—Solidly constructed, usual \$1.25 kind, Monday, for79c

Bennett's Special Monday Offer

100 E. & H. Green Stamps With Each Ton, \$5.00 or Over

COAL

Capital \$6.50
Coal 6 TON

Let us have your order for your winter's supply of coal tomorrow. As a special inducement we are offering 100 E. & H. Green Trading Stamps with each ton ordered, at \$5.00 or over. We make prompt deliveries, and give you best kind of service.

SCIENCE AND THE POLES

Movement of the Earth and Effect at the Axis.

HOW ASTRONOMERS GET RESULTS

Actual Occupation of the Poles by Observatories Would Vastly Increase the Sum of Human Knowledge.

The actual occupation of the poles would add enormously to the advancement of science. In the continent of Rey, William P. Riggs, S. J., director of the Creighton university observatory. In the initial number of the Creighton Chronicle, the distinguished astronomer condenses a vast amount of information concerning the earth's movements. The difference of the poles and the equator, and the needed light science would gain from prolonged observations at the earth's axis. The paper follows:

The poles of the earth are, in the mathematical as well as in the ordinary sense of the word, singular points, that is to say, they possess many essential features which do not apply in any way to other points on the earth's surface. By definition the poles are the extremities of the earth's axis. The earth, as we know, is a ball, and is turning. That it is a ball, or approximately a sphere, is proved by the appearance of the horizon at sea, by the equal dip of the horizon in all directions, by the different aspect of the starry heavens as seen from different points on its surface, by the shadow it casts upon the moon in a lunar eclipse, and lastly by extended measurements of its surface. That it is in rotation is proved by the classical experiment of Foucault's pendulum, by the gyroscope, and the deviation of projectiles, and especially by the science of celestial mechanics, which establishes its rotation as an essential postulate.

We know also that the earth is carried forward bodily as a whole, and that its center moves in a well-defined orbit about the sun. This feature does not interest us at present, and we shall dismiss it with the statement that the earth runs a little over a million and a half miles a day, and in so doing turns round once on its axis in moving forward about two hundred times its own length. This, as we see, is a very moderate rate.

The Earth a Spinning Ball.
The poles, as was said, are the extremities of the axis about which the earth turns. This axis is often said to be imaginary, as opposed to real, and when we speak of a wheel turning on an axis, or a globe or a wheel turning on an axis, or a globe, in fixed journals. The earth, of course, has no real axis in this sense, as it is freely suspended in space. When, therefore, we say that the earth's axis is imaginary, we mean that it is exactly like that of a ball, which may be thrown up into the air, and to which we may give a more or less rapid spinning motion. This spin-

ning ball is then said to rotate, or turn about an axis, every point in it and on it, except those on the axis itself, moving in a true circle of its own. The center of each of the circles is on the axis of rotation at the foot of the perpendicular dropped to it from the given point. The points farthest away from the axis are described in the largest circles, moving in a true circle of its own. The center of each of the circles is on the axis of rotation at the foot of the perpendicular dropped to it from the given point. The points farthest away from the axis are described in the largest circles, moving in a true circle of its own. The center of each of the circles is on the axis of rotation at the foot of the perpendicular dropped to it from the given point.

It is evident that all the points in and on the earth's surface must move together in such a way that their relative positions are not changed nor the sphere distorted. Hence, while they all have the same angular speed about the axis, that is, they all run the circuit of their own circles in the same time, their linear speed, their miles per hour, must depend upon their distance from the axis. Thus at the equator every point moves about 2,000 miles in twenty-four hours, that is, about a thousand miles an hour. Omaha is about 6,000 miles from the earth's axis, and rotates therefore at the rate of about 750 miles an hour. As the poles are on the axis itself, they do not rotate at all, their linear speed is zero. This, therefore, is the first reason why they are called singular points.

Effect of Rotation.
The consequence of this immobility is a total loss of the so-called centrifugal force. This force is the apparent tendency of a point to recede from the center of rotation, it is in reality a case of inertia, according to which it tends to retain its direction and remain on the tangent line. At the equator this tendency is a maximum, and amounts to 1/28th of the gravitational attraction. So that the weight of bodies is lessened there by one pound out of every 28. As a consequence the movable constituents of the earth's surface, the air and water, have receded from the axis and approached the equator, and have there accumulated in a ring of matter thirteen miles thick. The equatorial radius of the earth is therefore thirteen miles longer than the polar radius. This difference between the radii of different parts of the earth's surface is a gradual one. The polar radii are the shortest, and the rest increase in length gradually until we reach the equator, so that a meridian section of the earth is nearly a true ellipse, with its minor axis running through the poles, and its major axis in the plane of the equator.

These results have been obtained principally by means of the pendulum. We know that gravity is the only force that moves a pendulum, and that the time it takes to complete a vibration is absolutely constant as long as the force of gravity and the length of the pendulum are the same. By transporting the same pendulum therefore to various parts of the earth's surface, we can determine the variation of gravity, and thus find the shape of the earth. This has been done already in so many places that we have a pretty accurate knowledge of the shape of the earth.

Long Kimonos

First showing of new holiday line Monday—Exquisite new ideas in silk and silk crepe, plain figured and floral designs. All fresh and new.

BENNETT'S

FREE—Any 15c Ladies' Home Journal pattern with the Fall style book, at50c

Silk Waists

Just unboxed, new models taffeta and mossaline silk waists; black and all late shades—

\$4.95-\$5.95

An Eventful Week in Suits

Big Sale of Wooltex Models and a Grand Climax to the Cohn Purchase

Never before a week so full of promise to suit buyers. Most impressive low prices ever made on fine suits. A sale involving only the most elite of the year's styles.

Every "Wooltex" Suit in stock in a sharp markdown. Everybody knows the high character of Wooltex garments. America produces no finer examples in women's tailoring. The lowest price "Wooltex" suits are carried in stock was \$35.00. Monday to add still greater interest to our big sale of the Cohn purchase we offer choice of any Wooltex suit in our house, at **\$29.50**

1,000 Handsome New York Models Worth \$25.00 to \$45.00
Will Be \$15, \$19.50, \$25, \$29.50, \$32.50

The second week of this sale finds the stock refreshed and replenished to completeness. The immensity of the purchase permits of greater variety for satisfactory choosing than you have ever enjoyed before.

The materials in these garments are highest quality Lymansville hard twisted worsteds in solid colors, made with long 45 to 52 inch coats and exquisitely pleated skirts. The large majority of them lined with genuine Skinner guaranteed satin.

To Out-of-Town People this is a great opportunity. Spend a day's shopping here, it will be a most profitable day for you.

\$22.50	\$25.00	\$35.00	\$40.00	\$45.00

Lawn Grass Fertilizer, pound, 10-25-pound sack 60c

SOME PECULIAR EPITAPHS

Lot of Funny Ones Found on Tombstones in Pennsylvania.

TOBIAS BROWN'S IS A REAL GEM

He and Four Wives Are Buried Under One Headpiece—Tennessee Puts One Over Us—Name.

Few regions afford so interesting a field for the epitaph collector as the counties of southeastern Pennsylvania round about Philadelphia, which were originally peopled to a large extent by Germans. In the ancient burial grounds of this district there are many repetitions of that one time popular tombstone stanza which is found in nearly every old cemetery:

Reader, behold as you pass by,
As you are now so once was I;
As I am now so you must be,
Prepare for death and follow me.

OUR PAPP.
Bucks county's graveyards supply several unusual epitaphs. A stone in the cemetery at Morristown is inscribed thus:
In memory of Samuel McCracken,
Who died April 15, 1862.
If leading politicians and priests
All go to Heaven, then I am bound
To stop at some other station.
McCracken made an agreement with the cemetery association for the erection of this monument and then committed suicide by cutting his throat. Beside McCracken rests his wife, and the inscription on the stone at her grave, in contrast with that on the adjoining marker, reads thus:
In memory of Phoebe, wife of Samuel McCracken, who died March 30, 1869. She died a firm believer in Christ, her Savior.
A crude picture of a horse kicking a boy is the principal feature of a tombstone in a cemetery near Doylestown, and beneath the carving are these words:
Sacred to the memory
of Henry Harris
Born June 25th, 1811,
Henry Harris and Jane
his wife. Died on the

4th day of May, 1887, by the
Kick of a colic, his bowels
penetrable and quiet.
Friend to his Father and
Mother and respected by
All who knew him. He was
to the world where horses
can't kick and where
sorrow and weeping
is no more.

Taylor & Shuck,
In the burial ground at the old Hilltown
church, Bucks county, are five tombstones
in a row, and the successive inscriptions begin thus:
Anna, wife of Tobias Brown,
Mary, wife of Tobias Brown,
Jane, wife of Tobias Brown,
Sarah, wife of Tobias Brown,
Tobias Brown—At Rest.

Even the solemn and serene cemetery
of the Moravians in Bethlehem supplies
an interesting addition to the list of queer
epitaphs in the following, which is inscribed on a stone at an Indian grave:
In memory to my dear son, James McDonald
Rose, eldest son of John Rose, principal
chief of the Cherokee nation,
died at Hilltown, Pa., 1864. His
corpse transported by Adams Express to
Bethlehem and interred in this sacred spot
November 27, 1864, aged 60 years 29 days.

At historic Trinity church, in the northern
suburb of Philadelphia, a tombstone inscription
recalls the early strife between
the Quakers and the Episcopalians
over the control of that place of worship.
It was founded as a Quaker meeting house,
but early in the eighteenth century it
passed into the possession of the Episcopalians.
The epitaph, dated 1708, reads thus:
Here by these lines is testified
No Quaker was she who she dy'd
So far she was from Quakerism
That she desired to have baptism
For her own babes and follow me
To these lines true witness bear.

The efforts of an eighteenth century punster
are apparent in a German epitaph in
Hood's cemetery, Germantown. Those not
conversant with German of course need
an explanation that the German word
"fry" is equivalent to "free." The epitaph
is at the grave of Johannes Fry and
concludes with this stanza:
Ich war der Frey, doch bin
Ich hier erst Frey worden.
Lebt Stunden Frey, so kommt
Du auch in meinen Ordet.
Translated the stanza would read: "I
was called Free, but here for the first time
I am really free. If you will live Free from
sin you shall be as Free as I am."
To match these peculiar Pennsylvania
epitaphs a tombstone over the grave of an
old darkey in an eastern Tennessee grave-
yard bears a name that might be worth
mentioning:
"Emmaria Denaerita Cream o' Tartar
Sweet Potato Caroline Bostwick."
This woman bore that name through life
and had to rest under a slab of stone with
it graven upon it in death.

Ich hier erst Frey worden.

"Emmaria Denaerita Cream o' Tartar
Sweet Potato Caroline Bostwick."
This woman bore that name through life
and had to rest under a slab of stone with
it graven upon it in death.

"MARY" NOT A LITTLE GIRL
Young Woman Called and Called, but
No Angel Child Appeared
on Scene.
The two young men were wandering
down Farmart street when a tall young
woman stopped at the corner of Seventeen
street and called back sharply to-
ward a group of children, as it seemed to
the young men, "Mary, Mary." There was
no movement among the children and the
woman repeated her call.
"Guess the kid don't obey her very well,"
said one of the young men, as he sized up
the situation. "There'll be a spanking com-
ing to some one."
The woman, still standing at the corner,
called out again: "Come here, Mary," this
time rather more persuasively. There was
no responsive movement by any of the children,
and the young men passed in their
walking to see what the outcome would be.
The young woman pursed up her lips and
whistled shrilly. The children kept on
playing and several nursemaids near by
kept on indifferently with their gossip.
Suddenly there was a patter of feet and
a rush, and a small dog with silky hair
came running out of an alley way and
dashed up to the feet of the young woman.
She attached a leash to the dog's collar and
then she turned the corner.
The young men said "Huh" and kept on
walking. And the children kept on playing.

A FEW DOSES END BACKACHE AND REGULATE OUT-OF-ORDER KIDNEYS

Your Kidneys will act fine and the most severe Bladder misery simply vanishes.
If you take several doses of Pape's Diuretic, your backache and distress from out-of-order kidneys or bladder trouble will vanish, and you will feel fine.
Lame back, painful stitches, rheumatism, nervous headache, dizziness, irritability, sleeplessness, inflamed or swollen eyelids, worn-out, sick feeling and other symptoms of sluggish, inactive kidneys disappear.
Uncontrollable, smarting, frequent urination (especially at night) and all bladder misery ends.
This unusual preparation goes at once to the disordered kidneys, bladder and urinary system and distributes its healing, cleansing and vitalizing influence directly upon the organs and glands affected, and completes the cure before you realize it.
The moment you suspect any kidney or urinary disorder or feel rheumatism pains, begin taking this painless medicine, with the knowledge that there is no other remedy at any price, made anywhere else in the world, which will effect so thorough and prompt a cure as a fifty-cent treatment of Pape's Diuretic, which any druggist can supply.
Your physician, pharmacist, banker or any mercantile agency will tell you that Pape, Thompson & Pape, of Cincinnati, is a large and responsible medicine concern, thoroughly worthy of your confidence.
Only curative results can come from taking Pape's Diuretic, and a few days' treatment means clean, active, healthy kidneys, bladder and urinary organs—and no backache.
Accept only Pape's Diuretic—fifty-cent treatment—any drug store—anywhere in the world. Ad.
