WINTER WHEAT PROSPECTS GOOD

Delayed Husking of Corn in Field

The government report was taken because and eased the market. Wheat was weak during the whole sension, receiving he support owing to the increase in the visible supply. Traders refused to support the market and the cush demand was only moderate.

Corn was firm at the start on some local demand, which was soon supplied. After the government report was issued traders construed it as bearish and sold the market down.

CHICAGO, Nov. 8.—Continuance of an enormous movement of wheat in this country had a weakening effect on the market here today and resulted in final losses of igo to %c, compared with Saturday's close. Corn was dragged down by a hearish government report and closed at net losses of %c to %c%c. Oats also closed easy bust provisions firm.

Heaviness and inactivity characterized trading in wheat throughout the entire session and at the close prices were almost at the bottom. There was a little firmness at the start, owing to a bulge of %d to id at Liverpool, but the market lacked support and prices soon eased off on only moderate selling. Primary receipts aggregating 1,811,866 bushels, compared with 1,166,000 bushels the corresponding day a year ago, told the story of the downward treating of prices, the cash demand being still inadequate to absorb this liberal movement. December ranged between \$1.01%61.62 and \$1.02% during the day and closed at \$1.02%. The corn market developed decided weak ness after the publication of the government crop report, which placed the new crop of corn at 2.757.316,000 bushels, or about 100,000,000 bushels in excess of last year's total yield. The market closed weak with prices at the bottom.

Trading in oats was quiet. Prices at the close were %c to %c%c lower. Provisions closed 2%c lower to 35c higher. The leading futures ranged as follows:
