BALLINGER SCORES CRITIC

Secretary Says Collier's Article is Tissue of Falsehood.

PRONOUNCED FAKE BY TAFT

Declares Magazine Published Well Known Railroad Picture Labeling It Power Site 300 Miles Away from Actual Location.

WASHINGTON, Nov. 9.—Secretary Richard A. Ballinger of the Department of the Interior this afternoon issued the following statement:

"My attention has been directed to the text of an article purporting to have been written by Mr. L. R. Glavis, which is to appear in Collier's Weekly and advance copies of which have been furnished by that weekly to the press.

"The Glavis story is a tissue of falsehoods and insinuations utterly unwarranted in view of the facts easily obtained by anybody who would take the trouble to appear in Collier's Weekly and advance copies of which have been furnished by that weekly to the press.

"It is not surprising that a publication which could in pursuit of this same propaganda, recklessly, under date of October 30, reproduce a view appearing on a familiar railroad folder of the Grand River canon in Colorado as a picture of an available power site for the purpose of unlawful acquisition on the South Platte river 300 miles away and across the continental divide should be willing, without the slightest effort to ascertain the real facts, to give wings to a story which had heretofore been submitted to no great and just man as the president of the United States, who, after a most careful consideration thereof, in which he had before him the entire files of the general land office and of the Secretary of the Interior relating to each and every one of the matters presented, pronounced the same disingenuous and without justification.

"The statement of Glavis has gained nothing either as to its veracity or justification in the interval since its presentation to the president and in view of the complete vindication by the president of myself and the other officers of the department concerned, I will make no further statement at present."

WALLA WALLA, Nov. 9.—Ex-Governor Miles C. Moore, one of the claimants to the so-called Cunningham group of coal mine claims in Alaska, who is in this city today made a statement in reply to the Glavis article, in which he says:

"Part of Mr. Glavis' communication containing what purports to be a statement from me, has one serious defect. It contains no truth.

"Glavis quotes me as saying Secretary Ballinger would have patented the Cunningham claims but for my protest. No such statement was made by Ballinger to me or to Glavis."

"He said that the foreign banks do not hold as 'till money' a sum greater than 3 per cent of the liabilities which in the United States the average is 10 per cent. The London banks, however, have either in their own banks or in the Bank of England 14 or 15 per cent of their deposits, the deposits in the central bank being just as important to them as is the money they retain.

"In addition these banks loan large sums to discount houses, subject to call on short notice, which they regard as another source of reserve. Another item of still greater importance is the fact that the commercial paper held by the secondary banks. This paper is receivable at the Bank of England and it is considered by the bankers as far the most important portion of their reserves."

Mr. Aldrich dwells upon the fact that the European laws make no requirement either as to the amount of the reserves or of their publicity. The percentage is left to the wisdom of the bankers. He said that the Credit Lyonnais, the greatest private banking institution in the world, kept precisely no money in its vaults, depending entirely upon the Bank of France in the case of large demand. But on the other hand, the reserves of the central bank amount to about 75 per cent of its liabilities, not only rendering it exceptionally strong, but making it a sure bulwark for other French banks.

Methods of Protection.
Asking himself how the great central banks protected themselves in times of trouble, Mr. Aldrich said:

"They advance the discount rate as they did the other day. For what? To attract gold from other countries, which has the effect of building up their reserves. This process is always successful. In 1897 the Bank of England advanced the rate to 7 1/2 per cent, and that step brought gold from twenty-two countries. I asked Mr. Campbell, the then governor of the bank, what he would have done if he had not secured the gold. He replied: 'We would have put the rate up to 10 per cent and that would have brought gold out of the earth.'

"What else do they do? They extend credits liberally to every one who is solvent and who has a right to borrow. In the case of shutting their doors and stopping the extension of credits, and refusing to give credits to their customers, they do these two things: They protect their own reserves, and they extend credit liberally to everyone who deserves it and who wants it.

"That is the whole secret of the method of these great banks and how they take care and regulate the affairs of these great countries in cases of probable trouble."

Contrasts With United States.
Contrasting this system with the rigid methods of the United States, Senator Aldrich said:

"I think this statement will afford a sufficient suggestion to you to show that we certainly ought to consider very carefully the question whether our banking system in that respect should not be re-constructed.

"I have no doubt myself, that the opinion which is everywhere expressed in Europe, that our system is barbarous, is correct. It certainly is against the experience of modern banking everywhere else."

Senator Aldrich did not go further, but it was evident to all that he found in the European reserve system features which in his opinion are superior to ours. He spoke especially of the confidence engendered by the foreign method.

The speech received most courteous attention and Mr. Aldrich was liberally applauded.

ALDRICH ON BANK RESERVES

Senator in Kansas City Speech Praises European Methods.

HOW ELASTICITY IS SECURED

Banks in England and on Continent Carry Nearly All Their Reserves in Big Central Banks.

KANSAS CITY, Nov. 9.—Reiterating his declaration that neither he nor the Monetary Commission of which he is the head, has any pet scheme of financial reform, Senator Aldrich tonight, in this city, dwelt at some length upon some of the advantages of the European banking systems over the systems in the United States.

He spoke after a dinner given by the Clearing House Association at the Baltimore hotel. Senator William Warner of Missouri introduced the Rhode Island system.

Mr. Aldrich found in the reserve system the most striking characteristic of the European banks, he said. He said that the central banks of England, France and Germany—the Bank of England, the Bank of France and the Reichs bank—hold all the resources of all the banks of their respective countries.

He pointed out that there is no legal requirement rendering it necessary for the foreign banks to keep in their vaults so large a percentage as is necessary in the United States, and that the subordinate banks regard money in the central institution just as available for their reserve purposes as if it were in their own vaults.

Little "Till Money."
He said that the foreign banks do not hold as "till money" a sum greater than 3 per cent of the liabilities which in the United States the average is 10 per cent. The London banks, however, have either in their own banks or in the Bank of England 14 or 15 per cent of their deposits, the deposits in the central bank being just as important to them as is the money they retain.

In addition these banks loan large sums to discount houses, subject to call on short notice, which they regard as another source of reserve. Another item of still greater importance is the fact that the commercial paper held by the secondary banks. This paper is receivable at the Bank of England and it is considered by the bankers as far the most important portion of their reserves."

Mr. Aldrich dwells upon the fact that the European laws make no requirement either as to the amount of the reserves or of their publicity. The percentage is left to the wisdom of the bankers. He said that the Credit Lyonnais, the greatest private banking institution in the world, kept precisely no money in its vaults, depending entirely upon the Bank of France in the case of large demand. But on the other hand, the reserves of the central bank amount to about 75 per cent of its liabilities, not only rendering it exceptionally strong, but making it a sure bulwark for other French banks.

Methods of Protection.
Asking himself how the great central banks protected themselves in times of trouble, Mr. Aldrich said:

"They advance the discount rate as they did the other day. For what? To attract gold from other countries, which has the effect of building up their reserves. This process is always successful. In 1897 the Bank of England advanced the rate to 7 1/2 per cent, and that step brought gold from twenty-two countries. I asked Mr. Campbell, the then governor of the bank, what he would have done if he had not secured the gold. He replied: 'We would have put the rate up to 10 per cent and that would have brought gold out of the earth.'

"What else do they do? They extend credits liberally to every one who is solvent and who has a right to borrow. In the case of shutting their doors and stopping the extension of credits, and refusing to give credits to their customers, they do these two things: They protect their own reserves, and they extend credit liberally to everyone who deserves it and who wants it.

"That is the whole secret of the method of these great banks and how they take care and regulate the affairs of these great countries in cases of probable trouble."

Contrasts With United States.

"I have no doubt myself, that the opinion which is everywhere expressed in Europe, that our system is barbarous, is correct. It certainly is against the experience of modern banking everywhere else."

Senator Aldrich did not go further, but it was evident to all that he found in the European reserve system features which in his opinion are superior to ours. He spoke especially of the confidence engendered by the foreign method.

The speech received most courteous attention and Mr. Aldrich was liberally applauded.

ROW IN CHICAGO PROBE

Judge Honore Asks Wagon to Leave Room, But Peace is Patched Up.

CHICAGO, Ill., Nov. 9.—Judge Honore of the circuit court today requested State's Attorney Wayman to withdraw from the investigation of the jury commissioners. The class came in a heated session in which the three judges took exception to an alleged statement of Assistant State's Attorney Michels last week, when he was quoted as saying that the judges intended to "hitwash" the jury commission.

Truce was finally patched up and the investigation proceeded after the state's attorney had denied that his assistant had made such a statement.

CRISTIAN MENCK, PIONEER, DIES AT GRAND ISLAND

Man Who Braved Earliest Hardships of State Passes Away in Hall County Home.

GRAND ISLAND, Neb., Nov. 8.—(Special.)—By the death of Christian Henry Menck, who died suddenly of heart failure, there has been removed from the stage of activity of this community the last of the three pilots of the first colony of white men who settled in any portion of Nebraska west of Columbus. Mr. Menck, the late Fred Hedde, founder of the Independent, and Mr. Barnard, a civil engineer, were the advance guard of a colony of thirty or forty people who came to central Nebraska from Davenport, Ia., in the summer of 1857 and located the present settlement of Grand Island on July 4 of that year, raising the American flag on the birthday of the nation. Mr. Menck brought to the settlement, in 1858 the first Hall county bride, having been married in the village of Omaha to Miss Katrina Harding, whom he had wooed before his departure from Davenport and who took a wedding trip with him from Omaha to Grand Island per ox team.

Mr. and Mrs. Menck celebrated their golden wedding last year and at that time Mr. Menck was still able to sing some of the old favorite German songs. His health continued to be good until this summer, and his condition was not such as to give the least alarm.

"Hitwash" the Jury Commission.

COTTON MARKET IS FIRMER
Reports Are Circulated that Pattern is Re-Entering Market on Long Side.

NEW YORK, Nov. 9.—The cotton market was decidedly firmer this morning and before mid-day was selling nearly 1/4 above the low level of yesterday on covering, renewed support from western bulls, which led to reports that Mr. Patton was re-entering the market on the long side and resuming active work in the southern spot situation. January cotton sold at 14.50 and May at 14.80 or 27 to 28 points above the closing prices of last night.

The Economy Booth

Something new! Something radically different.
A special sale place for high class "odd lines."

First huge selling tomorrow

THE "Economy Booth" is a place set aside in our establishment for the swiftest disposal of the "odd" lines, "discontinued" lines and "short" lines that WILL bob up in the course of a business as large as this one. Our trade has increased in leaps and bounds since coming over to Farnam street—odd lines are accumulating FASTER than ever.

WE wish to keep all stocks "spick and span." In keeping with this store's reputation, and "Economy Booth" prices will hasten and smoothen out the task of DISPOSING of irregular stocks. No matter HOW badly WE wish to rid ourselves of these "Economy Booth" items, no matter HOW low the prices are, we are assured of qualified goods—quality again—and again—at the prices asked. We will announce "Economy Booth" events from time to time and it will behoove you well to watch for them.

Prices Like These in Evidence in "Economy Booth"

Overcoats Boys' Overcoats. A lot of 65 coats, in ulster lengths, in handsome mixtures. Come in single or double breasted styles and in sizes ranging from 10 to 16 years. The garments offered are worth all the way to \$10 each, but they're odd lines and "Economy Booth" price is..... \$4.75	Girls' Coats 175 fine coats in ages 8 to 16 years. Full lengths in plain chevots, chin-chillas, fancy mixtures, and some English tweeds with plaid backs. Some are handsomely braided. A few sizes to 15 years included. Positively worth to \$13.50. In "Economy Booth" at..... \$10
Overcoats Boys' Overcoats. 168 military style overcoats, in ages 12 to 16. Chest measures 28 to 33. (Small men take notice.) In fine Scotch effects, and stripes and plaids, in grays, olives and tans. Coats that have sold to \$12 are in "Economy Booth" tomorrow at..... \$7.50	Child's Coats 120 children's coats in ages 2 to 6 years. Mostly castor shades in broadcloths, but some chevots in red, blue or brown, some coverts and some black "bearskins" are here. All handsomely trimmed, and while worth \$5 they are in the "Economy Booth" at..... \$3.95
Shoe Sale The Economy Booth tomorrow will include several hundred pairs of MISSES' and CHILDREN'S shoes at 50c per pair less than regular. Regular qualities in patent and kid, but some sizes are gone. \$3.00 kinds at \$2.50. \$2.50 kinds at \$2—while \$2 kinds are..... \$1.50	Underwear A lot of GIRLS' and BOYS' "Mentor" and "Star" 2-piece underwear in gray or white. Fine ribbed fleeced cotton; some Jersey, some Derby ribbed. Sizes broken, but every age from 2 to 9 years is somewhere in the lot. Underwear that sold at 25c at per garment..... 19c
Turban Sale A lot of infants' Bearskin Turbans, with ear tabs, must go. They come used, but tomorrow they're in "Economy Booth" in white, blue or red and are regular 45c value. At..... 25c	Blankets "Teddy Bear" Crib Blankets may be had in the "Economy Booth." Sizes 29x39, in pink, blue and gray. Blankets that should be selling at 75c are to be cleared at, each..... 58c
