

# NATIONAL HORTICULTURAL EXPOSITION

## COUNCIL BLUFFS, IA. OPENS

### MONDAY, NOV. 15 AND CONTINUES FOR ONE WEEK

Exhibits from forty states and territories, including Mexico and Canada. \$35,000 IN PREMIUMS

#### Liberati's Famous Band and Grand Opera Singers

will give concerts every afternoon and evening. Application for reserved seats for the concerts and opera may be made now to E. H. Doolittle, Council Bluffs, Ia.

The finest exhibition of fruits, vegetables, nuts and flowers ever assembled in the United States. A splendid lot of attractions. Government exhibit of reclamation service.

#### EXCURSION RATES ON ALL ROADS

Freeman L. Reed, Superintendent.

### ROADS CUT OUT STOPOVERS

Privilege on Roads West of Chicago Ends First of Year.

### LINE OF U. P. ADDITION SETTLED

Will Run from Northport to Gerling, Paralleling Platte River—New Station at Sheridan—S. J. Ellison Gets Promotion.

Stopover privileges on all one-way tickets will be absolutely abolished on all railroads operating west of Chicago beginning January 1. This is the ultimatum of railroads affiliated with the Western Passenger association and it is further stated that the rule is ironclad and will remain in effect forever and ever.

The rule does not apply to round-trip tickets and in no way applies to tourist rates or special tickets. Tourist tickets are sold with stopover privileges included and so specified on the transportation. Only single trip tickets are affected upon which local rates apply.

The death knell of the stopover privilege is sounded by the roads for many reasons," stated a passenger representative of the Burlington this morning. "Every little town in the country big enough for its mark on a railroad map has sought to have its burg favored with stopover rights. One town in particular that wanted the privilege because some other town had it was placed on the list where tickets were good for stopovers. In three months two passengers and one dog availed themselves of the privilege of stopping over at that place.

"It is a nuisance to the road, of its advantage to the passenger and a source of many woes to the conductor. It is just as easy for the passenger to purchase his ticket accordingly where local rates apply and he cannot avail himself of special rates."

### New Union Pacific Line.

Right-of-way for the Union Pacific from Northport to Gerling has been definitely settled. The new line will parallel the Platte river and will be constructed on the south bank of the stream. For some time it was a question whether to use the north bank or the south bank of the stream. The spur will be forty-five miles in length.

### New Sheridan Station.

Sheridan, Wyo., is to have a new \$50,000 Burlington station, according to a story printed in the Railway Record. Vice President Willard of Chicago and George W. Holdrege of the local offices of the Burlington route will visit Sheridan while on their trip of inspection through the west. They left Omaha Monday afternoon.

Milling of ore from the Battle Mountain mine at Bannock, Nev., was begun Monday, according to a message from that place. Omaha people are interested in the Battle Mountain district.

### Ellison Gets Promotion.

S. J. Ellison, formerly assistant general passenger agent for the Great Northern railway, has been appointed general passenger agent for the road with headquarters at St. Paul. He is well known among Omaha railroad officials.

George W. Loomis, assistant to the general manager of the Burlington route, has gone east on matters of business.

### DOUBLE SHIFTS ON THEATER

Men Will Work Twenty-Four Hours a Day to Complete Brandeis Building.

Double shifts will be worked today on the new Brandeis theater, and the work will hereafter be pushed twenty-four hours a day to insure the completion of the theater by December 27, when W. J. Burgess has billed the Merry Widow company for a week's engagement.

W. B. Weston, superintendent of the building for the contractors, the Thompson-Starrett company, said that if the weather man would do his share he would attend to the rest and have the building completed on the agreed time. He says he will have the theater enclosed so the marble men and decorators may be at work by December 1.

Saturday was a critical day in the work on the building, for three seven-ton girders were hoisted into place safely. Two were over the stage and one over the entrance to the theater proper. The fly gallery material is all prepared by the Pax-

## Distinctive New Modes in Coats and Tailored Suits

**NOTWITHSTANDING** the enormous business we have been doing right along, we have been at the same time building up our stock with all of the very newest models of the season so that now we can say: "Our great stock is at its best!"

You will find hundreds of beautiful and original styles here that are out of the ordinary, each garment having an individual style touch to it that gives distinction as well as exclusiveness.

### New Suits \$25 to \$115

Two and three-piece suits—exclusive new models—just the kind that you expect to find at this exclusive house. Each unusual in cut and finish, with a distinctive charm. Some are made in beautiful embroidered designs, some are plain, but fancy in cut, exploiting new ways of fastenings, and others are strictly plain tailored styles. Prices range—**\$25.00, \$29.75, \$35.00, \$39.50 and up to \$115.00**

### New Coats \$17.50 to \$65

The demand for coats that are different from the ordinary is very great. Here you will find them in profusion. Every correct model is here waiting for you. The materials are the very finest, the tailoring is perfect, and they fit so gracefully that they will please even those whom the ladies' tailors fail to please. Prices range—**\$17.50, \$25.00, \$29.75, \$35.00 and up to \$65.00**

### WIRELESS THROUGH RAILS

Dr. Millener Would Electrify Tracks with High Voltage Current.

### UNION PACIFIC EXPERIMENTS

Local Wizard of the Mysterious Fluid Believes Travelers on Trains Will Soon Be Able to Do Business While Going.

Electric currents of high voltage flashing through the steel rails of great transcontinental railways may revolutionize wireless research and make possible the use of the wireless telephone aboard swiftly moving passenger trains. This is the belief of Dr. Fred H. Millener, electrical expert for the Union Pacific railway, who has quietly been experimenting with the wireless telephone in addition to his investigations into the field of the wireless telegraph.

Instead of using a network of wires, as is generally the case, as a ground connection in carrying out experiments with

wireless instruments, Dr. Millener has a plan to electrify all the tracks in the Union Pacific yards. The same idea, if found successful, could be extended to all the railroad systems of the country.

In order to make practical use of the wireless telegraph and the telegraph, adequate ground connection must be established at receiving or dispatching stations to pick out the correct electrical waves from the atmosphere. Chicken wire is often used to cover a field or a network of wires is strung above the station. Dr. Millener proposes to use the network of tracks about the Union Pacific yards and tracks as his ground circuit. Will give the system a trial within the near future.

### No Danger in Plan.

"There will be no danger in magnetizing the rails," states Dr. Millener. "We may pass a heavy current through the steel, yet a person coming in contact with the rails would never know that a high voltage was passing through the steel. That person would also have a ground connection, so there could be no conduction of electricity from the rail to the person. It is a perfectly safe proposition."

Dr. Millener scouts stories from the east to the effect that the wireless telephone has been successfully employed on the Erie railroad. He says they could not have obtained the proper ground connection unless the rails were used and this is an entirely new idea.

Dr. Millener will first try his wireless telephone from a locomotive cab and later install his instrument on a passenger coach. His instrument has been completed. If successful he claims that it will be possible to communicate long distances from a swiftly moving passenger train.

Work is now being done on his electric transformer. This will weigh, when completed, 5,000 pounds. 500 sheets of iron, 2x24 inches, will be used in the construction of the transformer.

This afternoon Dr. Millener delivered a lecture before the Woman's club on the "Romance of the Telephone."

Foley's Honey and Tar cures coughs, quickly, strengthens the lungs and expels colds. Get the genuine in a yellow package. Sold by all druggists.

### LOCKED-UP BABIES BURNED

Two Little Girls Dead and Third Suffering Agony in Hospital.

### MOTHER GOES SEEKING FUEL

Leaves Three Children in Bed and House Locked, Fire Breaks Out and Helpless Little Victims Perish.

Agnes, 1 year of age, Annie, 3 daughters of Joseph and Mary Zidarick, Second and William streets, burned to death while their mother had gone to get fuel to keep them warm, and Rose, 4 years of age, the eldest child, was terribly burned, as a result of a fire that broke out in the home, where the children were left asleep in their bed by the mother early Tuesday morning. The baby died within fifteen minutes after being taken from the building and the next child lived hours. She and Rose were taken to St. Joseph's hospital and Rosie will recover.

All the children were horribly burned and their pitiful wails and helpless struggles to escape their doom were heart-rending.

Joseph Zidarick and his wife are Polish people. The father works at the smelter and left his humble home at an early hour. At about 7:30 Mrs. Zidarick put the three little girls, her only children, to bed partly dressed, and, locking both doors, started out in search of wood to replenish the kitchen woodbox, which was very low. The family are in poor circumstances and it is only by the hardest kind of effort that the wolf has been kept from the door.

In the bedroom where the children slept was a small heating stove with a wood fire in it. Just how the fire started may never be known, but shortly before 9 o'clock Jacob Yonovsky, a neighbor, saw smoke issuing from the place. Hastily sounding an alarm he and Adam Graczer, who lives across the street from the Zidaricks, ran to the house, only to find the doors locked. Bursting open windows at either end of the house the two entered and rushed into the bedroom where the bed and wall were a mass of flames.

### Children Write Helplessly.

The three little ones, powerless to aid themselves, were lying on the bed, writhing in the agony of their burns. Their pitiful cries and groans struck horror to the hearts of the men who entered the building and, in danger of themselves being badly burned, the two lost no time in removing the children. They were carried by tender and eager arms to the Graczer home and the fire department soon had the blazing building under control.

Fifteen minutes after being rescued Agnes Zidarick died after excruciating suffering. The police station was notified and Dr. Harris responded. Temporarily dressing the burns of the surviving children, they were hurried to St. Joseph's hospital.

It was a pathetic scene when the mother of the babies returned from her wood-hunting expedition. Mrs. Zidarick's condition makes her case the more serious. The woman was frantic with grief and it was with difficulty she could be restrained. Hundreds of people were drawn to the scene of the tragedy and expressions of sympathy were heard on all sides. Willing neighbors have come to the aid of the stricken mother and every possible assistance will be given the bereaved parents. Their home is not so badly damaged but they can continue to occupy it, as a result of the quick response of the fire department.

### BIG BRIDGE IS WEAKENING

New Williamsburg Structure Becoming Affected by Strain of Increasing Traffic.

NEW YORK, Nov. 8.—Signs of weakness are said to be appearing in the land span of the new \$20,000,000 Williamsburg bridge because of the tremendous strain put on it by increasing traffic.

There is no danger from snuff when Chamberlain's Cough Remedy is used.

### Heaven on Earth Aim of Charity

Prof. Lucile Eaves of Nebraska University Tells of Ideals of Organized Workers.

An unusually able discourse on social problems was that of Prof. Lucile Eaves of the department of sociology and political economy of the University of Nebraska at the Young Men's Christian association last evening when there was introduced by Miss Ida V. Jontz, general secretary of the Associated Charities of Omaha, a training class for social workers. Prof. Eaves came to Omaha under the auspices of the Associated Charities' bureau and in her address last evening gave plenty of encouragement and advice to those affiliated or contemplating affiliation with the movement.

In her opening remarks Prof. Eaves gave a summary of the associated charities movement, showing the conditions that existed in England which gave rise to it, and then of its growth in this country. As a result of the movement, she said, there has been brought about social development and the abolition of social evils.

Prof. Eaves then spoke of the need of leadership and illustrated how in the past it was the belief that work along this line should be with a view to saving people from hell; now it is possible to make a heaven upon earth. "The matter of leadership," said the noted social worker, was one of special attraction, in that through it was afforded a peculiar opportunity for obtaining education. The movement, said Prof. Eaves, was a most practical undertaking and one which cannot fail of purpose. In closing Prof. Eaves made an emotional appeal for assistance, saying there was always the assurance of definite results.

As outlined the purpose of the training class for social workers is to give a general knowledge of organized charity and to give such knowledge as shall create a broader sympathy for the man or woman who is "down and out."

### Kills Two Women and Himself

Laborer Shoots Wife and Daughter of Rancher in Ferry Building, San Francisco.

SAN FRANCISCO, Nov. 9.—The ferry building arcade, crowded with thousands of homeward bound suburbanites, was the scene of a double murder and suicide early tonight, when Ignate Novikov, a Russian laborer, shot and killed Mrs. P. A. Scholz, wife of a wealthy Sonoma county rancher, and her daughter, Betty.

Novikov then fired a bullet through his own head and died within an hour without regaining consciousness.

No cause for the shooting has been learned. The girl was a member of the musician's union of this city.

Children like Chamberlain's Cough Remedy. It is pleasant to take.

### Class Rush Fatal to Boy

Ray Graham Dies of Fractured Skull Sustained in Color Fight at Waterloo, Ia.

WATERLOO, Ia., Nov. 9.—(Special Telegram)—Ray Graham, 20 years of age, died Sunday night from injuries received Saturday in a class rush. He was struck by a classmate on the temple, which caused a fracture of the skull. The combatants were not members of foot ball teams, but were raising class colors when the fatality occurred. The accident was purely unintentional and no blame is attached to anyone of the students.

If you desire a clear complexion take Foley's Orino Laxative for constipation and liver trouble, as it will stimulate these organs and thoroughly cleanse your system, which is what everyone needs in order to feel well. Sold by all druggists.
