## SENTIMENT IS VERY BULLISH

Corn Very Firm, with Light Offerings Because of the Wet Wenther Over the Corn Belt of the West.

OMAHA, Nov. 15, 1909. Very little credit is given the news of locust damage in Argentina and last year's harvest will easily be equaled this year. Sentiment is very bullish and values are firm and may work higher for the time being, but eventually the market will have to seek a lower level, as the wheat crop the world over has been larger than for some years.

Corn is very firm, offerings extremely

Corn is very firm, offerings extremely light, while wet weather over the corn beit is the factor of most strength, as unfavorable weather will delay the movement.

Wheat was strong and higher on further covering by shorts. Sentiment in the pit was builtish throughout the day and little or no wheat was effered, buyers being forced to bid up before longs let go of their holdings.

Corn held very firm and values were slightly higher than yesterday. Light receipts with a moderate demand holps to sustain the market while traders are inclined to be builtsh on the unfavorable weather and the strength in wheat.

Primary wheat receipts were 1,150,000 bu, and shipments were 1,150,000 bu, against receipts last year of 281,000 bu, against receipts last year of 281,000 bu, against receipts last year of 250,000 bu, against to 250,000 bu.

Clearances were 4,000 bu, of corn, 1,000 bu, of outs and wheat and flour equal to 448,000 bu.

Liverpool closed unchanged to 3d higher

Liverpool closed unchanged to %d higher on wheat and %d higher on corn.

were also firm and closed at moderate advances.

The wheat market was strong all day and prices moved over a wide range. One of the prominent shorts was said to have purchased more than 2,000,000 bushels of December wheat during the day. Reports frem Duluth indicated that wheat there was being rushed eastward in large quantities, and it was predicted that stocks there would decrease nearly 1,400,000 bushels during the week. St. Louis reported an advance of le to 2c in red winter wheat Kansas City also registered a more moderate advance. Foreign news was mostly of a bearish nature. The range on the December delivery was between 15017a. The market closed active and strong, with prices only 4c from the top, final quotations on December being at \$1.00%.

tions on December being at \$1.00%.

Wet weather extending ever the greater part of the corn belt was the principal reason for moderate strength displayed. Shipping demand for cash corn was again brisk, but offerings were light, which resulted in an advance of %c. The close was firm, with prices up %%c to %%%c. Oats were firm, but the volume of trading was small. The market closed firm at not gains of a shade to %c.

Freeh advances were made in provisions as a result of renewed buying by shorts based on a continuation of light receipts of live hogs throughout the west. Pork was especially strong, the January delivery advancing 37%c above the previous close.

The market closed strong, with prices up 2%c to 35c.

ear. Sharply curtailed runs each day have

Sharply curtailed runs each day have partly caused the keener demand and better quality has also served to enlived buying interest. As a result, the trend of prices on all kinds was sharply higher from the opening, Monday's general market showing an advance of 15925c over the close of the previous week. Stronger prices each succeeding day leaves current quotations about 25946c higher than a week ago.

"Clean-ups" constitute no small percentage of feeder offerings and country buyers are not making any grand rush for the common and inferior kinds. The more shitble grades of both sheep and lambs, however, have been selling readily at prices fully steady to possibly some nigher as compared with last week's close.
