ized ishor-chall be crushed. The labor organizations consist of its employes, the workers, their wives and little ones, huthat they live, they have no purpose other A. L. Beshey, vice O. Wood, removed. than self guarding their lives, their charactor, their future, the safety of the republic, and humanity.

"These factors now confront each other By their purposes, attitude and actions must they be judged.

"On June 1, 1909, the United States Steel corporation proclaimed its decree of hostility toward labor. The right of the work ers to associate for their common protection was no longer to be recognized or tolerated. Accompanying that decree was a notice of a further reduction in the already scant wages of the workers. The decree went into effect July 1, 1909, that an earnest effort be made to thoroughly or garize all employes in the iron, steel and tin plate industry and subsidiary co-related trades. Owing to immediate pressing necesrity caused by the present strike and the indefensible hostile attitude of the United States Steel corporation, we earnestly call gard to lowa improvements. President upon all national and international unlons of America to send at least one organizer to assist in this work. We further urge and recommend that in all places where mills are located, the central labor organisations appoint special committees with instructions to co-operate in this work. For educational purposes we recommend that this manifesto be made a special order in all central labor organizations at the first meeting in January, 1998.

"We recommend that the executive council of the American Federation of Labor issue a circular to all unions of America an appeal for financial contributions to aid the striking iron, steel and tin plate workers.

We further recommend that the amount of such contribution should not be less than 10 cents per member.

"In view of the great wrongs perpetrated by the United States Steel corporation, not only against the workers, but the public generally, we recommend that a committee be appointed by this conference to wait

upon the president of the United States, the president of the United States senate. the speaker of the house of representatives and such members of either house of congress as may be deemed advisable for the purpose of laying before them the grievandes from which labor suffers at the hands of this corporation.

"At the instance of the United States Steel corporation officers of local, municipal and state government have unwarrantably tyranized over citizens, invading to constitutionality guaranteed right of free assemblage and free speech. We recommend that committees be appointed by this conference to walt upon the governors of scales and such other official representatives of counties and municipalities as are in control where the United States
