

### A Single Cold Room

In your home. There is no excuse for it. If you use a furnace and have one or more cold rooms set up in a HOT WATER RADIATOR and connect to your furnace. Heat it with waste hot gases from your furnace. Possibly your furnace is not doing all it should. We have improved hundreds of them by our methods.

If you have hot water or steam you may need an extra radiator or two. It may be that you are losing too much heat in your cellar. Asbestos as applied by us will force the heat up stairs.

Did you ever investigate what a wonderful invention the HOWARD THERMOSTAT is—a heat regulator that pays for itself and maintains a uniform temperature day and night? Do you need a two or four hole LAUNDRY STOVE—one that will heat from 20 to 100 gallons of water and keep it at a boiling point?

Our three "Phones"—two bells and Independent—are at your service. Our Inspector's services and estimates are free.
