

GRAIN AND PRODUCE MARKET

Wheat Trading Opened Strong on Favorable Cables. LONGS TOOK IN THEIR PROFITS. Half-Holding Wheat for an Expected Squeeze in December Delivery and Are Holding for a Raise.

OMAHA, Dec. 29, 1909. Strong and higher cables gave strength to the wheat market for the opening, but longs took advantage of the bulge and were taking profits. Bulls predict a squeeze in the December delivery on the last day and are holding the wheat for sharp advances in the next two days. Corn was forced to still lower levels by heavy selling and profit taking. The bears are predicting a heavy movement and lower prices. Demand is easier after the early advance and profit taking was indulged in by holders of long stuff. Cash wheat sagged off owing to light demand. There was little or no feature to the market. Corn was weaker through the session continued steady by trading. Receipts are increasing and a good few movements are assured as soon as railroads begin to improve. Cash wheat steady at 48 1/2c. Primary wheat receipts were 17,000 bu. and shipments were 20,000 bu. against receipts last year of 11,000 bu. and shipments of 12,000 bu. Primary corn receipts were 70,000 bu. and shipments were 40,000 bu. against receipts last year of 50,000 bu. and shipments of 30,000 bu. Clearances were 30,000 bu. of corn, none of the members of Capital Lodge No. 1, A. F. W. M. Liverpool closed 1/4c higher on wheat. Local range of options:

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Market of Trade. CHICAGO, Dec. 29.—Likelihood of a falling off in the wheat receipts is causing the wheat market to close firm today although firm quotations were no lower to 1/4c higher compared with yesterday's close. Corn and oats closed firm and provisions steady. Wheat was unsettled and prices moved over a range of 1/4c to 1/2c. The bulk of business was in May. During the day, wheat sold between 1.10 1/2 and 1.11 1/2 and May between 1.10 1/4 and 1.11 1/4. Firm cables gave the market a strong start, but local receipts and heavy selling in the northwest, where it was thought recent severe storms would interfere with deliveries. The market was inclined to drag, but became strong later, owing to reports from the northwest that country receipts were decreasing. The market closed at almost the top, with December at 1.11 1/2 and May at 1.11 1/4. Renewed liquidation caused considerable reaction early in the session, but a firm tone developed later owing to the strength of wheat. The market closed with prices unchanged to 1/4c higher. Oats were inclined to be weak during the fluctuating session, but rallied in the final hour and closed, with prices 1/4c lower to 1/2c higher. Provisions closed unchanged to 1/4c higher. The leading futures ranged as follows:

NEW YORK STOCKS AND BONDS

Cheerful Outlook for Values Tempered by Money Conditions. IMPROVEMENT COMING SOON. Confidence is General That There Will be a Material Relaxation in Loan Market After First of Year.

NEW YORK, Dec. 29.—The action of the stock market may be fairly regarded as reflecting a cheerful view of the outlook for values tempered by the restraining influence of the reasonable restriction of money market supplies. Confidence in a material relaxation of money after the first of the year is reflected in the effect of the present tightening of call loans. The foreign exchange market has been quiet and steady, with a slight advance in the rate of exchange for gold. The market for government securities is quiet and steady, with a slight advance in the rate of interest for long-term securities. The market for foreign exchange is quiet and steady, with a slight advance in the rate of exchange for gold.

WEATHER IN THE GRAIN BELT. For Nebraska, Partly Cloudy, with Rising Temperature Thursday. OMAHA, Dec. 29, 1909. An area of high pressure, accompanied by light winds from the northwest, moved down over the central valleys from the western Canadian provinces, within the Rocky Mountain region, and over the weather prevails this morning from the Rocky Mountains east over the central valley of the United States. Zero weather extends south over the Mississippi valley below St. Louis, and temperature is rising, with a few snows reported in the extreme upper Mississippi and Missouri valleys and Manitoba.
