Merger Scheme
Council at Walthill Votes to Take Out Patents if Plan Goes Through.

WALTHILL, Neb., Jan. 5.—(Special Telegram.)—The council of Omaha Indians, which held an all day session here Wednesday, after listening to explanations offered by government officials covering the proposed merger of the agency with that of the Winnemagoes, adopted a resolution protesting against the change and threatening to demand their patents at once if the plan is carried out.

Two hundred heads of families were present at the council. Mr. Kneal, the newly appointed joint superintendent; A. G. Pollock, the former superintendent; Special Agent McCou, and How L. Hammond were the white men at the meeting.

Following the discussion it was voted in case the government refused to rescind its action and retain Mr. Pollock to demand their patents and withhold from under the supervision of the department. The first period under which the government continued its supervision over the Indians expired several years ago, but was extended ten years. The extension, the Indians assert, was illegal and they assert unless the plan is retained, they go into court and demand they be allowed to take out their patents.

The services were under the auspices of the Odd Fellows lodge and the sermon was preached by Rev. J. H. Sisk of Chester, Neb. The deceased had been engaged in business at this place for the last six years, moving here from Richardson county.

"WHY, I could not make such soup myself!"
So exclaimed a lady visitor to our plant after watching the various processes by which we bring our Tomato Soup to perfection.

Of course she could not make such soup. No one could without our advantages.

You would have to live close to the New Jersey market gardens—as we do—to get such big perfect tomatoes as we receive fresh from the vines every day in the season, for

Campbell's Tomato Soup

You would need artesian wells on your premises—as we have—to obtain such crystal-pure water as we wash these tomatoes in. You would require special strainers like ours, as fine as the point of a needle, to remove—as we do—every particle of core-fibre and every shred of the celery and parsley with which we flavor this incomparable soup.

Just taste it and you will realize that making tomato soup at home is a waste of time and money. *But be sure you get Campbell's. Accept no substitute.*

We authorize the grocer to return the price of any of Campbell's Soups with which you are not fully satisfied. And we pay him.

21 kinds 10c a can

Give me Campbell's Soups for joy For strength and hardihood I'll lick the plate, and lick the key Who says they are not good.

Just add hot water, bring to a boil, and serve.

Many a puzzling question is answered by Campbell's Menu Book. Free to you if you write for it.
