Will Be Hard to Work Out in Practice-Russia Also Hostile.

TOKIO, Jan. 8 .- The leading newspapers in their issues of tomorrow disapprove of the acceptance by Japan of Secretary Knox's proposition for the neutraination of the Manchurian railways. The consensus of opinion here is that the plan is impracticable because Japan would not receive a penefit proportionate with the sacrifice entailed.

It is held that the interests of the Japanese settlers in southern Manchuria could not be protected under such an arrangement. Official circles remain noncommittal on the subject. It is generally believed here that Russia will decline to accept the American suggestion.

There is no intimation of when Japan's reply to the note will be forthcoming, but there is reason to believe that the government will not concede the necessity of a change in existing conditions, through which a claim of equal opportunity is afforded, unless, at least, the contemplated project would give the strictest guarantee for the future safeguarding of Japan's interesta in Manchuria.

The Japanese experts do not regard the hatruction of a railroad from Aigun in northern Manchuria to Chin Chow Fu as a practical business proposition.
