Gas Service Boost For Your Own City

The people of Omaha are too modest. Perhaps we have been so ourselves.
For years we have gone ahead; first at perfecting the methods of manufacturing the gas and extending the supply to every part of the city, then at improving the personal service to our customers.
We have given this latter phase of the business serious thought and we are not through thinking about it and will continue to improve in every way we can. Today, however, we pride ourselves that our customers receive the best gas service in the world.
We won't be modest any longer, we intend to tell what we are doing and at the same time secure your co-operation.
