Facts About the Gold Dust Twins

The Gold Dust Twins are cartooned more than any other trademark in the world. Life, Puck and comic papers have given up front pages to them.

This is significant when you stop to think of it. The Gold Dust Twins are simply the trade-marked picture of Gold Dust—the greatest cleansing powder the world has ever known.

If you are not using Gold Dust to wash your clothes, wash your dishes, clean your pots and pans, scrub your floors and doors, you are missing your money in a needlessly hard way.

Large Amount of Money Paid to Aid Y. M. C. A.
Dr. Clarence Barbour Says Eighteen Million Dollars Has Been Contributed in Two Years.

The Association, the Church and the Kingdom" was the theme of an address delivered last night by Dr. Clarence A. Barbour, associate secretary of the religious department of the International committee of the Young Men's Christian Association in the Y. M. C. A. building.

"First—that the associations recognize not only theoretically but in a practical way the primary of the church." The associations are an arm and an agency of the church. In fact they are the church doing work in another sphere.

"Second—the church has a right to expect co-operation on the part of the associations in promoting to the church the work of the associations with any man is not done until that man is linked in a vital and organic way with the life of some church."

"Third—the church has a right to expect that the associations will do for the church what the church cannot do in its own buildings by reason of the fact that the associations have equipment for certain sorts of work. It is churchmen who pour their millions into the checkbooks of the associations.

Some Things You Want to Know The Third Degree.

No subject is more difficult to investigate with satisfactory results than the so-called "Third Degree." This is the mysterious process by which the police are supposed to write the truth from criminals, or at least, come as near it as possible without submitting the suspects to the tender mercies of the rack and thumb screw.

The rule of law, and the instruction in all police manuals in English speaking countries, is that when a person under arrest displays symptoms of talking about his case in a way that may be used against him at trial, the officer shall warn him that anything he says will be repeated by the officer in court.

When the third degree is applied it is almost invariably done in the presence of none but police officials or others intensely interested in obtaining a confession. If the prisoner signs a confession, then repudiates it in open court on the ground that he was forced into making it, he finds the police lined up solidly against him, ready to swear that the confession was voluntary.

An interesting case illustrative of the alleged third degree method, and subsequent reputation, was that of Henry Maas. He was a New York crook who was convicted some years ago of having been an accomplice in a Baltimore robbery.

Several prominent New York detectives appeared against Maas when he was put on trial. They offered what purported to be a voluntary confession from him, admitting his guilt and describing the crime. Maas employed eminent counsel and entered a vigorous denial of the story.

That the police of large cities have used such methods as those charged by Maas is hardly denied, but no policeman will admit that they are in use now. "Talk it out of them the best way you can," was the terse description of the third degree by a detective of twenty-years' experience in Washington, D. C.

The theory of the detectives in the ordinary application of the third degree is that a criminal almost invariably has a secret craving to confide in some one, especially a friend. He has been locked in a cell a day or so and the confinement has begun to worry him.

The chance influence of the personality of the questioner is often remarkable. Two or three years ago a young, well-dressed woman who had been begging on the streets of Washington was arrested on the suspicion that behind her petty graft she had some blackmailing scheme.

At first she refused to answer any queries, defied the United States and wound up by swinging a heavy chain-bag on the jaw of the chief of detectives. A reporter who was in the room chipped in with the remark that she was making a fool of herself, whereupon she calmed down, gave him the goods, and pitiful story of her life, and thinking him a detective, willingly went with him to the police station where she was to stand trial.
