Ask the agent: "How heated?"

People are fast learning the difference between a house equipped with old fashioned heating methods or inferior apparatus and the homemaking qualities of a house fitted with ideal heating. They shun one and seek the other. The living, renting, and sales value of any building, large or small, is vastly increased by

The several hundred thousands of these outfits installed all over America and Europe are so comfortably, economically, cleanly, and healthfully warming the occupants of all classes of buildings that buyers and renters are now insistently de-

manding them. These outfits of IDEAL Boilers and AMERICAN Radiators save so much in coal and cleaning, in time and temper, in health and happiness, and without rusting or repairs, that they quickly repay their cost. In all the world they have no equal-hence the wide use by and high endorsement of all eminent engineers and architects in every civilized country where heating is needed.

ADVANTAGE 16:- The phenomenal success o. IDEAL Boilers is also largely due to the fact that they are made in sections so that even their largest parts can be carried through an ordinary size doorway. For this reason they can be quickly put in old buildings without disturbing the occupants. In fact, in unmodernized or old types of houses they can be erected, including the necessary piping and radiators, without the necessity of removing the stoves or hot-air furnace until the new heating outfit is ready to fire up. They can be quickly erected in wintery weather when the old, crude heaters get badly worn or collapse. Ask for catalog "Ideal Heating" which tells all the advantages.

nt firrer. This did not berinds cost of laber, pipe, to climath and other conditions.

sance or run the risks of old-fashioned heating methods. Tell us kind of building you wish to heat-old or new-farm or city-inquiries cordially welcomed- and put you under no obligation to buy. Every prominent architect and every heating engineer recommend exclusively the IDEAL Boiler and AMERICAN Radiator. They cost no more than inferior apparatus. Accept no substitute.

Prices are now so attractive that no one
