DEMOCRATS HOLD POW WOW

Flock to Des Moines from All Parts of Iowa.
CANDIDATES ON EVERY SIDE
Desire for Office--by No Means Diminished--Bashful of Waterloo Will Run for the Governorship.

(From a Staff Correspondent.)
DES MOINES, April 8--(Special Telegram.)--The democrats of Iowa held a conference and banquet here today and regaled themselves with rounds of oratory and abundance of enthusiasm. About 200 attended the conference. The plan was to talk over the situation and see to it that there were candidates in the field for every office and no default anywhere.

The state was agreed upon, at least not openly, but a general understanding was arrived at. It seems certain that H. Bashful of Waterloo will be the candidate for governor. He may be opposed in a friendly way by John T. Dennison, but this is not likely. Neither Jerry Sullivan nor Claude Porter will run for the place. No selection was made for lieutenant governor. E. G. Dunn and Walter Harvey have been slated for railroad commissioner, but S. H. Mercer of Iowa City has entered the race.

LOST LETTERS PLAY BIG PART

are likely to be cross-examined to the greatest length if Mr. Brandeis, the Glavis attorney follows the precedent he has already set with the minor figures for the defense.
Protest from Brandeis.

He said he had trouble with Glavis about the turning over of certain official papers in the Seattle office. Glavis, he said, took a bundle of papers away with him and declined to let Christensen see them until he had made copies.

MICA AND LITHOGRAPH STONE
These Products Are Forming Substantial Output of the Black Hills.
CUSTER, S. D., April 8--(Special.)--Mica mining in the Custer district is becoming one of the leading industries of the Black Hills and one that is proving a source of much revenue to the owners of the ground. Two principal companies are operating in this district, the Washington company, which has been slowly increasing its production for the last two years, and the Chicago Mica company, formerly the Black Hills Porcelain Clay and Marble company. In the case of the former the company found upon entering the field the widespread impression that the mica beds were but pockets and likely to blend out before much work had been accomplished, but the company went ahead with its development and the supply soon commenced to increase and to improve in quality as depth was gained. Today the Washington company has gained a depth of 60 feet on the New York mine and has a much finer quality and a larger quantity of mica than at any time during its operations, and its shipments to Denver and Pittsburg are steady each month.
