Crop, Trade and Industrial Reports Are More Cacceful, NEW YORK, April 16.-Bradstreet's to day rays:

day rays:

Crop, trade and industrial reports are rather more cheerful this week. This does not apply so much to actual immediate conditions as it does to great basic factors likely to be effective in the future, and as yet it may be said that the improvement is one of tone or sentiment rather than of scinal expansion in demand or distribution. Indeed, except at a few markets, there is little apparent expansion to be chronicled, and on a basis or business done the turnover is probably little different from a week ago, with repression or even disappointment visible in a number of lines. On the side of favorable happenings may be pinced the unquestionably good repurts rethe side of favorable happenings may be placed the unquestionably good reports received from the farming districts, except from a few sales where whiter wheat cannage has been considerable.
