

IN WOMAN'S WORLD

Tax Collector Will Not Realize on All Jewels

The Omaha tax collector will not have the opportunity of realizing anything from some of the magnificent jewels owned by Omaha young women, for several of these young women are not to reside in this city. One young matron owns some remarkable jewels, but rarely wears them here, so that she need not tell the tax man their real value. One especially fine piece of workmanship which would dazzle the tax collector or anyone else having an opportunity of seeing it is an iridescent lavaller. The central stone is an unusual diamond of historical value. Around this are sapphires and several kinds of different shaded stones set in platinum. Back of the entire setting are tiny springs which add to the dazzle of the stones. A savage viewing this for the first time would think the evil eye upon him.

One of the most valuable gifts received in Omaha recently was given one of the late winter brides who has gone east to reside. This was a diamond necklace, given her by the groom's family. The entire necklace was of diamonds with small stones in the back graduating to larger stones in front and hanging from this were jewels matching in size those of the necklace.

A beautiful ring was received this week by an Omaha young woman who will be one of the summer brides and who will reside in the west. This is composed of diamonds and emeralds. But these affairs do not concern the local tax collector.

Group of Salad Dressings

ALMOST every family has its own favorite salad dressing, but as each dressing fits one class of salads better than another, it seems wise to make a study of the various kinds, to draw on them according to occasion. Most every one prefers the mayonnaise for a rich salad, such as chicken, lobster, tomato, sweet bread, etc. Others object to the olive oil and give the preference to a boiled dressing. This, indeed, is particularly complimentary to a potato or cabbage salad. For the lighter dinner salads, a French dressing can scarcely be improved upon.

Here, then, are various salad dressings that can be cut and pasted in the family cook book, ready for any emergency:

French Dressing—With many cooks the French dressing is usually hit or miss. There is, however, a set formula that ensures having the proportions right every time. Put into a bowl or bottle a half teaspoonful salt and a saltspoonful pepper. Add four table-

Oranges with Jelly.
Select fine oranges with perfect rinds; cut one-half hole in stalk end, remove pulp and pith; soak oranges in cold water for one hour, then scrape inside, rinse in cold water, and set aside to drain on cloth. Holes made in skins may be stopped with butter. Set oranges in cracked ice and fill half of them with bright pink orange jelly and the remainder with orange ice cream; when quite firm, wipe carefully; cut in two, serve tastefully on a green leaf or special napkin.

spoonfuls olive oil, stir with a fork or shake if in a bottle. Add one tablespoonful lemon juice or vinegar, mix thoroughly and pour over the salad.

Italian Sweet Cream Dressing—The Italians make a tasty dressing for green salads by adding sweet cream, salt, pepper and vinegar to taste. This is easily made and is delicious.

Tomato Dressing—Place in a chopping bowl three small green onions, three stalks of parsley and a slice of green pepper. Chop, then mix in the salad bowl, together with a table-spoonful of vinegar and a teaspoonful of salt. Arrange sliced tomatoes in layers, placing a little of the dressing on each slice. If preferred, the ground pepper may be substituted in place of the green pepper.

Peanut oil has been found an excellent substitute for olive oil by many who object to the latter. Many cooks use it in place of butter that is so often added to the poined dressing. However, it should be used carefully in this substitution, as it is more oily than the butter.

Woman's Work

Activities of the Organized Bodies Along the Lines of Undertaking of Concern to Women.

Mrs. Halleck Ross, chairman of the Nebraska Federation of Industrial committees, has endeavored as far as possible to have the work of the committee presented at all the district meetings this spring. Mrs. Ross has put special emphasis upon industrial education and is urging that the club women inform themselves of its possibilities and such efforts and measures as are now being agitated to establish it more generally. The Davis bill now before congress is one of the important measures tending to establish industrial education in the schools. This bill was given special attention last year by the General Federation's industrial committee, which endorsed it and urged the women to give it their support. The establishment of agricultural high schools appealed particularly to the women of the rural clubs and on the farms, and many of them have been active in their efforts to secure the passage of the Davis bill in consequence.

It is a tribute to the intelligent work of the women that speakers have become reluctant to appear before the district conventions to present these matters, admitting that the women are better informed than anyone else along these lines. It is gratifying to the women, too, that the time is passing when men will come before them with all the confidence that accompanies a consciousness of superior wisdom, only to offend their intelligence with patronizing compliments and exhibit an amazing lack of serious information on the subjects they are supposed to present. Slowly, but certainly, communities are waking to the realization that the women are doing serious work and that the danger of making themselves ridiculous is more remote from them than from some who have been taken more seriously in the past.

The election of Mrs. Andrew K. Gault of Omaha as vice president general of the Daughters of the American Revolution for Nebraska will meet the approval of scores of club women in Omaha and over the state who know Mrs. Gault and her ability. Last year she served the local chapter as regent and has also had an active part in the state work and councils. She is also an active club woman, having been secretary of the Omaha Woman's club and leader of its household economies and parliamentary practice departments. Mrs. Gault is also a member of the Nebraska society Daughters of 1812, which she will represent as a delegate at the national meeting in Washington which follows the Continental Congress of the Daughters of the American Revolution.

The oratory department of the Woman's club held its last meeting of the spring Tuesday morning at the home of Mrs. George Darr. In appreciation of her work as leader, Miss Lillian Fitch was given \$20 in gold. Mrs. Samuel Rees making the presentation in rhyme. A program followed, Miss Emily Boitz contributing a vocal number, Miss Louella Allen, violin; Miss Grace Hancock, piano, and the members of the department gave readings. Thirty-one members were present. Miss Fitch was re-elected department leader; Mrs. Grant Williams, assistant leader; Mrs. J. Berger, secretary and treasurer and Mrs. Samuel

Pinchot Denounced by Big Corporation Head

Former Forester Prevented Development of Water Power, Says Henry L. Doherty.

ST. LOUIS, Mo., April 22.—In an address before the League of Electrical Interests tonight, Henry L. Doherty of New York, president of nineteen of the greatest public utility corporations in the United States, in New York, Denver, Philadelphia and other cities, bitterly attacked Gifford Pinchot as the man who has done more to prevent development of water powers than any other, and a man who has been guilty of frequent and disastrous mistakes.

"If Pinchot did not directly inaugurate many statements which were untrue, he at least, by reiterating these sensational statements, managed to stir up almost universal anger on the part of the republican people and resentment toward the various interests accused by him," he said.

"Had our family physician made such frequent and disastrous mistakes in the diagnosis and in the treatment of a patient, I am afraid we would have been ready to forgive and forget as we were in Mr. Pinchot's case."

"I regret to refer to Mr. Pinchot personally, and I do so only to show how much of intelligence, education, broad experience and favorable environment, can fall into a popular error, due to existing agitation and the public's readiness to lend a quick ear to any charge of usurpation on the part of wealthy people—which is always a temptation to the man seeking notoriety or having any other axe to grind."

Doherty denounced the "popular craze for attacking all quasipublic corporations" as unjust and futile.

"We are living in an atmosphere which merit be termed the tyranny of intolerant public opinion. The one great obstacle to
