Limitation of Armaments. In this piece, something should be done as soon as possible to check the growth of armaments, especially naval armaments, and to bring about a general agreement which would place itself at the mercy of some international power.

Now, having freely admitted the limitations to our work, and the qualifications to be borne in mind, I feel that I have the right to have my words taken seriously when I point out where, in my judgment, great advance can be made in the cause of international peace.

Finality. It would be a master stroke if those great powers honestly bent on peace would form a league of peace, not only to keep the peace among themselves, but to prevent, by force, if necessary, its being broken by other nations.

Treaties of Arbitration. The advance can be made along several lines. First of all there can be treaties of arbitration. There are, in the states, so backward that a civilized community ought not to enter into an arbitration treaty with them.

The Hague Tribunal. Secondly, there is the further development of the Hague Tribunal, of the conferences and the work of the Hague Tribunal, of the conferences and the work of the Hague Tribunal.

HYDE BEGINS HIS DEFENSE

Attempts to Show Death of Swope Due to Natural Causes.

MILLIONAIRE WAS ENFEBLED

Dr. Spangler Testifies that Uraemic Poisoning, Typhoid Fever or Meningitis Might Have Caused Convulsions.

KANSAS CITY, May 5.—That Colonel Swope was in ill health for months prior to his death and that natural causes might have been responsible for the convulsions of Thomas H. Chrisman and Margaret Swope, the defense in the Hyde trial attempted to prove in opening its case today.

Dr. Spangler testified that Colonel Swope was so enfeebled for a year before he died that he fainted several times. The millionaire, said Mr. Spangler, told him the day before his death, that he might die at any time.

From Dr. F. W. Frothingham the defense elicited the information that either uraemic poisoning, typhoid fever or meningitis would result in the symptoms shown by the three Swope when in convulsions. On cross-examination the physician admitted the attacks also resembled cases of strychnine poisoning. The witness was in the hands of the state when adjournment was taken at noon.

Mitchell Police Are on Strike

MITCHELL, S. D., May 5.—(Special.)—The city here but one policeman to care for the peace and dignity of the town. The mayor had decided to postpone his appointment of the police department until the June meeting. Chief Cunningham and two patrolmen felt they were entitled to a re-appointment at once, and because the mayor did not hand it out to them, they quit their jobs.

a great many of the protests he initiated without regard to their feasibility. In order to give various states their proportion of the fund, the mayor had to make a statement of the value of the public lands. Mr. Ballinger was not able to give a direct answer, but said in answer to a question by Attorney Vertrees that he had not been able to get either of the officials of the reclamation service to express any doubt as to the feasibility of any project.

Mr. Ballinger was asked about the letter in which Mr. Garfield told the president that Secretary Ballinger had instructed Director Newell and Engineer Garfield, slowly, in order not to reflect on the previous administration. Mr. Ballinger said he gave no such order and recalled that no such suggestion had been made.

Mr. Ballinger said that since Pinchot's policy of the forestry bureau was recalled that no such suggestion had been made. "If there was any suggestion," continued Mr. Ballinger, "it was at the instance of Mr. Newell, in a letter to Senator La Follette, suggesting such a course. The fact is that restorations were not made slowly, but were made in the course of two or three weeks, at the instance of the reclamation service. It was not a fair and truthful statement. I had no desire to reflect on the previous administration, however, and did what I could to avoid it."

Forestry Policy Reversed. Mr. Ballinger said that since Pinchot's policy of the forestry bureau was recalled that no such suggestion had been made. "I think it had the effect of keeping a great many people from going to Canada because there is a great deal of land in our reserves capable of being developed."

Number of Amendments Passed by Lower Body.

WASHINGTON, May 5.—The house today adopted by 106 to 77 an amendment to the railroad bill providing that when a railroad when in competition with a water route lowers its rates, such rates cannot be increased without a showing on the part of the railroad of new reason for such increase.

ANNOUNCEMENT

We wish to inform our friends and the public that we have this day sold our entire stock of Pianos, Player Pianos, and Piano Player Music to Hayden Bros. The piano and player part of our business has hampered our efforts in developing the talking machine end of it.

The talking machine business has become a large and a growing one, and we have just added the product of the Zon-O-Phone factory to our already large Victor business, for both of which we are now factory distributors.

There is, therefore, a greater demand upon our energies that must be provided for in this way. We bespeak for Hayden Bros. the very best of attention to our former customers and friends in the Piano and Player line.
