GRAIN AND PRODUCE MARKET

Little Change in Wheat Values on Market Saturday.

RALLIES AFTER THE BREAK Corn Fatures Weak Throughout the Day---Receipts Slowly Increas-

ing-Still Claim Winter Wheat Damage. OMAHA, May 14.

There was not much change in wheat raines today, the market ruing steady, seing well supported by yesterday's buyers. Weather conditions are ruling the situa tion at the time being and bull leaders still claim heavy damage to the winter wheat. Heaviness in the cash corn situation has had a weakening effect during the last few days, while receipts are gradually in-

Wheat railled after a slight break at the start. Shorts were best buyers on the break and after light offerings had been absorbed prices eased off again and clos-ing values were a shade lower than yester-

the corn futures were weak throughout the day on selling by cash nouses. Receipts are slowly mereasing and sample offerings were sold at \$60 to \$60 under yesterday. Shipping demand has stackened and is disappointing.

Primary wheat receipts were 477,000 bushels, against receipts last year of 168,000 bushels, against receipts last year of 168,000 bushels and shipments of 181,000 bushels. Primary corn receipts were 330,000 bushels and shipments were 727,000 bushels, against receipts last year of 280,000 bushels and shipments of 255,000 bushels.

Clearances were 142,000 bushels of corn, 2,000 bushels of oats and wheat and flour equal to 216,000 bushels.

Averpool market was closed in respect King Edward's death.

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, May 14.-Excellent rains in

CHICAGO. May 14.—Excellent rains in northern Texas and Okiahoma today refreshed the rigening wheat and, incidentially, helped revive the drooping courage of the bears in the Chicago wheat pit. Novertheless, it was largely a waiting game for the speculators. The close for active options was 14/10/24c off from last mgnt's figures. May delivery finished it down. Cornended 14/10/24c lower and oats 14/2 lower to 14/10/24c. He covering by shorts in wheat vesters. The covering by shorts in wheat vesters. WEATHER IN THE GRAIN BELT

Flour, bbis.

Temperatures Have Moderated in the River Valleys. OMAHA, May 14, 1910.

Receipts, Shipmenia

OMAHA, May 14, 1910.

The area of high pressure overlying the country east of the Rocky mountains continues to drift slowly eastward and its crest now overlies the upper lake region. Barometric depressions continue in the northwest and southwest and are followed by an area of high pressure that is moving in over the north Pacific slope. Temperatures have moderated slightly over the upper lakes, upper Mississippi and Missouri valleys and northwest, but are lower in the Ohio valley, the southern states and ex-Ohio valley, the southern states and extreme southwest. Killing frosts occurred in the upper lake region, heavy frosts in the upper Mississippi and Ohio valleys and lighter frosts in the middle Mississippi valley. Rains occurred in Colorado, Kansas, Oklahoma and Texas within the last twenty-four hours and are scattered twenty-four hours and are scattered throughout the upper Ohio valley and eastern states this morning. Weather conditions are unsettled in the west and the outlook is favorable for showers in this vicinity tonight or Sunday, with warmer tonight.

to Indicate Weakness.

ENGLISH TRADING A BIT LIGHT Some Criticism Because St. Paul Places Securities Abroad Instead of in the United States.

NEW YORK, May 14.—(Special Telegram.)—While the stock market was listless through the greater part of the week, this did not indicate weakness; on the contrary there was an undercurrent of strength which was manifest while the trading was slight. The absence of English markets the last two days of the week and a falling off in English trading earlier had no effect upon the United States market.

It was feared that the death of King Edward would affect the world's money markets, causing a tensity which might be embarrassing. From day to day this week there has been no appreciable effect on the

there has been no appreciable effect on the market. Call money has been maintained upon an equal rate, varying between 3½ and 4½ per cent. Time money is a shade firmer, with a slim demand. the per cent. Time money is a shade firmer, with a slim demand.

In connection with conditions in the money market, the tremendous influence of the Standard Oil company in financial affairs is revealed. Standard is, perhaps, the heaviest lender in the world to rall-roads and industrial corporations. From time to time within the last ten days there have been reports that Standard is putting millions upon millions in Wall street, and when we conside the marvelous reserve of the corporation the possibility of such action could not be disputed. The net surplus set aside by the Standard since 1901, including the present year, is over \$315,000,000. Notwithstanding this, the corporation at the present time has more money out at interest than any other corporation in the world. This is merely cited to show the substantial manner in which tight pisces could be tided over without the necessity of securing foreign money should an exceptional opportunity arise.

Good Market at Home.

At the present time there is much criticism relative to the action of certain corporations, notably the Chicago, Milwaukee & St. Paul raliway, seeking foreign funds through the sale of bonds abroad. It is not made necessary on account of lack of mogey in this country. The bonds could be soft here quite as easily as abroad. The point is that the bond market in this country at the present time has been so flooded with issues that a better rate for the bonds can be secured abroad. That leaves more money for immediate use here, but the profits on the debentures, however, go out of the country. Good Market at Home,

money for immediate use here, but the profits on the debentures, however, go out of the country.

The bond market has not responded in any marked degree to the placing of certain debentures abroad. The American bond market is congested. A slight increase in activity is noted in the bond department of the stock exchange, but it is not of such a character as to give it significance. In the private market these are no indications of a big revival of domestic demand.

New York banks this week gained cash to the extent of \$7.313,000. From the interior there was a heavy flow of currency, the net gain from that source boing in the neighborhood of \$6,000,000. On operations with the interior there was a net gain to the banks of \$1,259,000. The United States subtreasury's returns for the week's transactions with the New York bank show net receipts by the government on all accounts of \$24.882,000; net payments by the government to the banks, \$25,141,000. Earnings of Railroads.

The United States Steel corporation has begun to curtail its output, not for want of orders, but to maintain a more even equilibrium in the law of supply.

Southern iron and, steel men are extremely optimistic over the southern outlook. Members of the executive committee of the company returned to New York the

tremely optimistic over the southern outlook. Members of the executive committee of that company returned to New York the other day from an inspection tour through Alabama and they have spoken nothing but words of glowing tribute to the new industrial south.

In the copper situation the same old elements and the same old cry prevails: The production must be curtailed. Copper metal men declare that improvement will unquestionably come just as soon as the output is

of the year's wheat crop in order to compare the growth of the world's crop to the increase in population. It is a notable fact that while the population has increased very rapidly the crops of this precious grain stuff have not increased.

The anthracite coal situation has been bettered by the bituminous strike. An unusual amount is being mined and being shipped.

Rumors of a Sale.

There was a continued strength in Canadian Pacific, Wabash and Rock Island, but the stocks were without influence on the general list. No credence was given to it, but the rumor was spread that Canadian Pacific had acquired control of both Wabash and Rock Island.

Reading declined nearly a whole point and Missouri Pacific was dull. Amalgamated Copper was helped by the announcement of the completion of the negotiations by which the Butte properties of Senator Clark will be purchased.

There was bullish activity in International Harvester and United States Rubber. The bullish activity around it o'clock was more pronounced in Amalgamated than elsewhere and as a result this stock attained a new high figure on the movement.

The market closed narrow but firm, Total sales were 29,566 shares. Money on call was nominally 3 per cent today. The borrowing was very light. The sterling market was firm, with rates five to ten points higher.

The bond market was dull.
