

IN THE RING FOR A MILLION

Enormous Sum Involved in Coming World's Championship Fight.

ALL SPELLS MONEY, MONEY

Both Giants Have a Vast Following. Which Causes All This Hubbub.—Big Difference of Opinion.

Not so long ago a famous railroad magnate remarked: "America thinks in thousands now, but fifty years hence it will be in millions." Apparently he was correct, aside from the fact that he was long on the date.

This additional financial burden offers one oddity, inasmuch as no one has come forward and charged that the latest tariff tinkering is responsible. Not even the insurgents at Washington have mentioned it in their propaganda.

These wise men of figures have already shaken loose a bagful of ciphers which when they stood up in rows with a single numeral in front of them make a most imposing array.

A Golden Feast. But, after all, that \$10,000 prize is but the appetizer which introduces the golden feast. In fact, it is hardly worthy of passing consideration.

Just as the dollars, which are the money, are away with the old adage that "Money makes money," it's brown and boxers that make the big money nowadays.

Assuming that Mr. Jeffries will accept the latter proposition. A little trifle of some \$50,000 is what the show expects figure as his share under those conditions.

While Johnson is apparently more versatile than his opponent, numbering among his other accomplishments the ability to drive an automobile with a minimum of speed while waving one-handed adieu to the passersby, he is not the financier that Jeffries is.

Both principals are business men as well as pugilists, however, and since there is likely to be a defeated hero late in the afternoon of Independence day, provisions were made in the way of a bain for his

Necessaries vs. Luxuries

By E. J. Haughton, Manager Home Life Insurance Company.

FROM east to west, and from north to south, the people of this great and glorious country are working just now, as they probably have not done before, upon one great problem of living and especially the cost of living.

There is a difference, and a very great difference, between actual necessities and luxuries. What is the difference between actual necessities and luxuries? The word "luxury" is defined in the dictionaries as "any article that ministers to the pleasures of the senses."

It is in the light of this great difference that life insurance becomes not a subject to regard lightly or to postpone, but an essential requisite, every man, whether rich or poor, should include life insurance.

making a total of \$100. Of the 10,000 travelers all but 600 will come from points in the United States and Canada. This gives a transportation expense of \$500,000 as a whole.

All Over the World. It is startling when you stop to consider it soberly, but there are plenty of facts to bear out the figures.

San Francisco Benefits. The total amount of money that will be spent by outsiders while in San Francisco can only be guessed at. It is possible to do some estimating, based on reasonable figures, which gives some idea of the golden harvest that awaits mine host of the far coast, however.

Several of these excursions will be conducted on a most elaborate scale, the charges running from \$50 to \$1,000 per person for the trip. One, to be known as the "Special de Luxe," will be limited to 100 passengers, and the promoters say that the majority of the reservations have been secured for already. Another will leave

New York on June 25 and will not return until July 1. This circuit, which is of itself a most pretentious affair, calls for stops of anywhere from three hours to a day at Indianapolis, Kansas City, Grand Canyon, Redlands, Los Angeles, Santa Barbara and Del Monte, on the way to San Francisco.

Luxurious Trains. All these trains will be solid vestibuled Pullman equipment, including parlor, sleeping, observation and buffet cars. Special drawing room and stateroom compartments will cost from \$40 to \$50 each in addition to the regular fare of \$50.

The newspapers are preparing to take care of the stay-at-homes. It will be one of the biggest newspaper stories that has occurred in years. There will be associated at the time of the average newspaper, besides a few from Europe.

FORTY GIRLS TO THE RESCUE

That Number of Nurses Give Pieces of Their Skill to Aid Victim of Flames.

Forty trained nurses are helping as they go about their work in sick rooms in various parts of Brooklyn, every one of them having played the part in yielding patches of flesh equal in size to a playing card, so that one of their profession, Miss Elizabeth Henry, a fire victim, might live.

Cheerfully they submitted their limbs to the knife of Dr. J. Sherman Wright, visiting surgeon of the Long Island College hospital, in Brooklyn, who grafted on the living cuticle to the burned lower portion of Miss Henry's body.

Miss Henry, while nursing Mrs. Charles Hooper of Madison, N. J., saved the life of Mrs. Hooper and her infant in a fire, caused by the explosion of an alcohol stove. The explosion had spread alcohol over the clothing of the nurse, and the flames ran to Mrs. Hooper's bed clothing.

Work of rebuilding the lead cuticle commenced at once. Two nurses were placed at Miss Henry's side, and she given anesthetics by Dr. Erdman, and Dr. Wright quickly transferred these patches of skin to the patient.

For the last week this program has been followed out and will continue along here week. The transferred flesh has taken hold and is growing and spreading. Dr. Wright says Miss Henry is out of danger and will recover, and, with all the hospital staff, declares that it was heroic of the young nurse of the class of 1907 that gave their popular fellow-worker a new lease of life.

MOVING PICTURE INDUSTRY. Remarkable Growth of the Business and Its Money-Making Possibilities.

To appreciate what has happened, is happening, and is likely to happen, you must understand something of the picture industry itself, according to Glenmore Davis in an article in "Success Magazine."

TEXAS HAS A FEW RANCHES BIG ENOUGH TO LOSE A GOOD-SIZED HERD. The biggest land owner in the Cattle Raisers' association is Don Luis Terrazas of Chihuahua, Mexico.

Right in Texas, however, there are some ranges big enough for a first class base-ball diamond or a game of croquet.

Another "pitchfork" in the Panhandle, is another good sized piece of dirt, with its 200,000 acres or more—a few acres either way doesn't count in computing Texas ranches.

SMPLIFYING THE CALENDAR

Proposed Changes Designed to Dispen- sation with Movable Anni- versaries.

The plan of reforming the Gregorian calendar which is said to have gained the advocacy of the pope has the merit of simplicity. It is proposed to make every year exactly fifty-two weeks by regarding New Year's as a day apart from the numbered days of any month, and also leap year day when it occurs.

How can they afford to pay such colossal sums? The answer is easy. Where it costs \$500 a week to operate the average first-class theater while a dramatic or musical piece is the attraction, the same house can be run nicely for \$500 with pictures as the offering.

Money is the only thing in the world with the courage to face an overture bill. Pure gold is twenty-four carats fine. Hearts of pure gold run about seventy-two beats to the minute.

Disillusion. "When I was a kid," said Uncle Jerry Peeler, "I used to hear of a turd in the mud that he called the gnatcatcher. Then they found another one, most as big as an elephant with four legs, and they called it a pig. I never seen either of 'em, and the gnatcatcher was a turd in the mud from Africa without havin' shot any gnatcatcher or any elephant satisfies me, 'cause that's the way it is with the world in existence, and never was, 'b'gosh!'"—Chicago Tribune.

A Sure Sign. "See here, Mr. Blink," said the young man who sent to do that plumbing work at my house was a new and inexperienced fellow. "Why, sir, he is a very good and careful worker. What was wrong about his work?" "I have examined it all over for years. Then how do you know he was inexperienced?" "Because he had all his tools with him when he came, and never left the job and never was 'b'gosh!'"—Baltimore American.

THE BANKERS RESERVE LIFE COMPANY
