tion of Law, 

tion of Law, 

NEW YORK, June 6 - Prices of stocks broke violently to new low levels for the general tide to the late session of the stock exchange today, after nervous and fevering to the fluctuitations up and down for most of the stock exchange today, after nervous and fevering to the break was co-incident with the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to Washington against the government of the circuits who have gone to washington against the government of the circuits who can be compared to the circuits of the circuits against the government of the circuits of the circu

gain is 1.0 per cent.; compared with the corresponding month last year, and 2.7 per cent. compared with the active year 1906. There are losses at New York and Boston, compared with both years, reflecting conditions in the financial markets, and probably to some extent in the cotton and woolen trades; but saide from those two centers practically all of the leading cities make larger returns than for previous corresponding periods. In New England there is some loss, due to the predominating influences at Boston, but most eities report gains, notably Providence, Hartford, Springfield. Worcester, New Bedford and Portland. In the Middle Atlantic States there were some very satisfactory gains and the exhibit indicates active conditions at the principal points, among them Philadelphia, Pittaburg, Buffalo, Rochester, Syracuse and Scranton. In the South Atlantic States the general showing is very good, the marked increases at Atlanta, Richmond, Norfolk, Savannah, Macon and Jacksonville indicating continued prosperity in the territory they serve. Business continues very active at most of the principal cities in the Middle South, and total exchanges for the mouth in that section are considerably in excess of the same period in any earlier year, and though there are a few small leases they are not of particular significance. Among the cities making increased returns are St. Louis, New Oriesns, Louisville, Memphis, Galvesten, Chattanoogs and Birmingham. Throughout the Middle West there is a general increase in bank clearings and the total makes a very impressive gain, although at a few points there are losses, and at some the gains are not so large as in previous months, Chicago being the most important of these, but the very large increases at Cleveland, Detroit, Milwaukee and Indianapolis give little indication of any setback to business. Every city in the Far West makes more or less gain over both years with which comparison is made, and at some it is extremely large, notably at Kansas City, St. Paul, Minneapolis, Omaha, Deuver, Des Moines and Sloux City, at which points business conditions are said to be very satisfactory. On the Pacific Coast prosperity is apparently well established, the large volume of commercial transactions being reflected in the increases shown. The comparison is made below of bank exchanges by sections

Discrimination in favor of lights and butcher weights was not as evident, of course, all kinds of hogs moving on the same basis. Best lights sold only a nickel higher than the bulk, high sales dropping to \$2.05.

It is needless to add that the market was a little lower than at last week's close. Declines of a nickel were the more frequent, but some business was done at signed lower figures. Total supply was limited, killers bought freely from the start and an early clearance was made. Shippers picked out a few loads, but their combined purchases did not exceed 20 per cent of the lowest level in several weeks. Hogs have sold locally at or below \$2.00 only on one or two occasions since the high point was
