Wheat Opens Firm, Causing Surprise to Traders.

CORN HAS BACKWARD SEASON

Lighter Cash Demand Noticed and Toward the Close Prices Are a Trifle Easier—Corn Values Steady.

OMAHA, June 9, 1910.

The firm opening in wheat was a surprise, as traders generally construed the government report as bearish. Spring wheat shows a decided increase in acreage, with conditions nearly up to last year at this period. It is conceded, barring any severe damage from now on until harvest, that the 1910 wheat yield will be above the average.

The government gave out no figures on the corn condition, but private reports continue to show a general backward crop to this season.

Wheat ruled firm at the opening and good commission house support held values steady. Lighter cash demand was noticed and toward the close prices were a trifle easier, when selling was more pronounced.

Corn values were very steady, but ranged narrow and unchanged. The situation remains a weather proposition, and no change is expected until more favorable growing weather, when country selling is predicted.

Primary wheat receipts were 317,000 bu. and shipments were 178,000 bu., against receipts last year of 273,000 bu. and shipments of 236,000 bu.

Primary corn receipts were 552,000 bu. and shipments were 442,000 bu., against receipts last year of 495,000 bu. and shipments of 289,000 bu.

Clearances were 6,000 bu. of corn, 20 bu. of oats and wheat and flour equal to 40,000 bu.

Liverpool closed ¼d higher on wheat and ½d lower on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June 9.—Alleged inconclusiveness of the government report as to the growing crop of wheat gave rise to vehement argument on 'change, and in the end helped put up prices. There was more debate, however, than trade. Assertions were also made that for the first time in many years the United States had no wheat sold to Europe for shipment during July, August and September. The close was firm here and ⅛@¼c net higher. Corn finished at an advance of a shade to ⅝@¾c, oats unchanged to ⅛c up, provisions showing a gain of 7½c to 25c.

Wheat speculators declared that the difference between apparent results on June 1 last year and actual facts after harvest were widely apart. Quotations most of the day were inclined downward, but so slowly as to lend no encouragement to sellers. Free demand for cash wheat aided in sustaining the market for futures. Purchases of 255,000 bu. since the close of business yesterday were reported. About all the No. 1 northern here has now been sold to local and eastern mills. In this connection comment was caused by the statement that only 700,000 bu. of the stock at Minneapolis had escaped ownership by the mills there or elsewhere. Talk of congestion in the July option continued, but met with rather authoritative statements that there are nothing but closing spreads outstanding. The range for September delivery was from 91c to 91⅞c, with the close ⅛c up at 91⅜c.

Stubborn strength characterized corn. September kept between 59⅜c and 60c, closing at the top of the day, a gain of 9@9⅝c. No. 2 yellow closed at 59¼@60c.

Selling of oats was surprisingly light. September varied from 35¼c to 35⅝c, and closed ¼c up at the higher level.

Provisions displayed considerable strength. Pork closed at an advance of 22½c to 25c, lard 7½c to 10c and ribs the same.

WEATHER IN THE GRAIN BELT

Fair and Warmer Weather is Predicted for Friday.

OMAHA, June 9, 1910.

The low pressure that extended along the eastern Rocky mountain slope Wednesday morning now overlies the Missouri valley, Oklahoma and Texas, with its greatest depression central over Texas. General rains preceded the low pressure over the central valleys during the last twenty-four hours and some very heavy falls occurred in the Dakotas, Nebraska, Iowa, Kansas and Missouri. A fall of 3.28 inches was recorded at Kansas City, Mo. The unsettled weather is extending eastward and rains are falling in the Ohio valley this morning. An area of high pressure, accompanied by clearing and cooler weather, overlies the west and northwest. This area of high pressure will follow the low pressure over the central valleys, and the weather will be cooler in this vicinity tonight, with clearing tonight, followed by fair weather Friday. Light to heavy frosts occurred last night in Wyoming and Yellowstone park.

NEW YORK STOCKS AND BONDS

Some Uncertainty in Speculation Following Falling Off.

RAILROAD RATES IN LIMELIGHT

Proposed Advances and Pending Legislation Still Most Important Factor in Stock Market Dealings.

NEW YORK, June 9.—There was a further falling off in the amount of the dealings in stocks today and some remaining uncertainty in the tone of speculation, although on a narrowing range of fluctuations. The relations of the railroads to the control exercised by the government held its prominence as a subject of influence and sentiment was unsettled all over the direction of that influence. The probable period required by the Interstate Commerce commission for the consideration of proposed rate advances was canvassed with some anxiety and the progress of the railroad bill through the conference stage was awaited with interest, especially the proposed restoration of supervision of the capital issues.

The movement of St. Paul was watched with close attention on account of a supposition that the policy of restraint on the market had centered its operations in that stock. The recent heavy selling of the stock has aroused much conjecture over its source and varying surmises over the identity of the seller made up one of the features of the day's market. The renewed depression of St. Paul at the outset of the trading was of considerable sentimental effect on the whole list and its rebound had the effect of relieving the heaviness of the general list.

The copper industrials were affected both here and abroad by the increase in surplus stocks of the metal during May reported yesterday by the Copper Producers' association and this constituted another influence in the early depression.

These influences at first overbalanced that of the reduction in the Bank of England official discount rate, which had the effect of reviving the London buying of stocks in this market. The item of the bank's weekly statement showed clearly the definite passing of the influence of the tax collections and the necessity forced on the central institution of effecting some distribution to the market of these heavy accumulations by purchase of treasury bills. The Bank of France and the Imperial Bank of Germany at the same time made strong weekly returns. Money conditions in New York also tend towards ease. The upward course of United States Steel helped to lift prices during the day.

Bonds were irregular. Total sales, par value, $1,641,000. United States 3s declined ¼ per cent in the bid price on call.

Bank of England Lowers Rate.

LONDON, June 9.—The directors of the Bank of England at their weekly meeting today reduced the minimum of discount from 3½ to 3 per cent. The influx of gold is improving the reserve and caused the reduction, while the bank's purchases of treasury bills made money more plentiful in the open market.
