Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued. Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

The Western Land-Products Exhibit To Be Held in Omaha Jan. 18th to 28th, 1911

Will Show How Several Million People Can Better Their Condition

IN EVERY City of any size we find hundreds and even I thousands who are not getting results commensurate with their ability and the amount of work they are doing.

Then there are a large number of people who are neither educated nor trained who deserve to fare better than they do. The solution to the problem lies in the populating of that wonder-

ful section known as the "Golden West." The stories that have been told about this wonderful section are true; they are not exaggerations, in fact, they are in most instances the very opposite, because, when you dis-

cover the vast possibilities that nature holds in store on the other side of the Rockies you will gauge people by your own experience in the east and then you will know that the truth in all its vastness will make your story seem like a fairy tale and when you tell others you, too, will have told the most wonderful stories in reason.

Just to show how some succeed read the following: S. L. Bennett, 2 miles north of Medford, realized, in 1908, from 21/2 acres in Newton Pippins and Ben Davis apples, 3,500 boxes of merchantable fruit which brought \$5,250 or \$2,100 per acre. Right in this section there are acres that produce \$4,000 worth of fruit at average prices in a single season.

It's hard for the average easterner to grasp this story as a real truth when he has frequently 80 or 160 acres, all of which do not net him \$4,000 in two seasons.

The Omaha Bee and The Twentieth Century Farmer

wish to convince the people about the wonderful possibilities of the west and they are backing up the Western Land-Products Exhibit because they realize that an exhibit of this kind will show people more of the real truth about this wonderful section than any amount of pure talk. And their real interest in the upbuilding of the empire is due to the fact that they realize that it is upon the west that Omaha must depend for its future progress and
