### Pineapple Fancies

ACH season more and more people become cognizant of the great food value of the pineapple and as a result 6000 B every year new ways of the fruit are suggested. If you are of those who enjoy the fruit only in the summer season, you may find these pineapple fancies pleasant eight months from now. Certainly pineapple owes a large part

E

of its popularity to the fact that it is cooling, refreshing and digests well, but it is also most adaptable and is quite in place at every meal. Cut in large pieces, with rind left, it makes delicious breakfast fruit. Dipped in sugar if you have a sweet tooth.

Fresh pineapple marmalade is delicious with crisp toast. Have you ever tried making this for temporary use from the portions of a pineapple not used when served as a first course? Stew it, having carefully removed

eyes and grated it until tonder. Then add a pound of sugar to every pint of fruit, and boll until it jellies slightly., tested in a saucer. To est quickly, less bolling is needed and the flavor is more delleate.

As first course for luncheon or dinare reliable. ner cut rounds of the fruit across the pineapple, leaving on the rind. Each is an inch thick. Put a round on a dessert plate, remove tough heart, fill

space with powdered sugar and cut into equal sections, but allow the piece to remain round. Each small secction is dipped in the sugar and eaten with the fingers. See

that the fruit is thoroughly chilled. Pineapple salad is good with mayonnaise or French dressing. The former is better, though less customary. Cut into small cubes, serve icy cold on lettuce leaves or in the second-out shell of the fruit. Make dressing with lemon instead of vinegar and marinate for half hour before serving.

Pineapple shells are artistic for serving sherbet, if a luncheon is not too large. Where the table is crowded use sherbet glasses and put in a thin silce of the fresh fruit or Maraschino cherry on each portion Pineapple served as a dessert should be shredded, not cut. Sugar and let

it stand on ice for at least an hour. Do not sweeten too much. This is a common fault. The preparation of pineapple is sim-

plified by scissors for cutting out eyes. The pulp itself is quickly cut into proper sized pieces with same scissors. In selecting pineapples see that they are solid, rather heavy for their size and not too ripe. Sugar loaf varieties

The best part of eating pineapple is that as a diet the doctors are recommending it instead of medicine.

At the Clubs

### At Happy Hollow.

Mrs. A. B. Somers is entertaining at luncheon at Happy Hollow this afternoon a orate white lingerie gown of French hand company of eight. The Dundee Bridge club enjoyed luncheon at her home on west Dodge street. Those and bridge at the Happy Hollow club this present were: The bride was charming in an imported afternoon.
