MOST MIXED PEOPLE ON GLOBE

Anglo-Saxon Race Strain Not So Pronounced in United States.

TEN MILLIONS OF FOREIGN BIRTH

Only Ten Per Cent of This Number Come from English-Speaking Countries—Political Gossip from Washington.

WASHINGTON, Sept. 9.—(Special.)—We Americans do not boast so much these days about our Anglo-Saxon race strain.

They are becoming the most mixed people on the globe. The census of 1900 showed a little over 10,000,000 people in the United States of foreign birth, not to mention some millions with one or the other of both parents foreign born.

The bureau of immigration of the Department of Commerce and Labor in its July bulletin shows the number of immigrants coming to the United States for every year since 1890, when the government first began to gather immigration statistics.

The aggregate of the immigration to this country since the last census, including the arrivals for the month of July, was 8,865,538. Of these but 910,551, or 10.2 per cent, came from English-speaking countries—England, Ireland, Scotland and Wales.

Where They Come From. The English speaking immigrants come from the British Isles as follows: England, 383,125; Ireland, 373,724; Scotland, 154,311, and the remainder from Wales.

The Italian came, 292,719 from northern and 1,531,818 from southern Italy. The mixed races that inhabit Russia and southeastern Europe sent of Russians, Rumanians, Slovaks, Roumanians, Croatsians, Slavonians and Lithuanians an aggregate of 1,521,523.

The total immigration to this country since 1890 was 27,394,253. The average for the first decade was 12,000; for the second,

UNCLE SAM AS AUCTIONEER

New Method Adopted for Selling Lands for Indians.

HOW TITLES ARE CLEARED UP

Fifty Thousand Acres of Good Soil in Oklahoma Will Be Disposed of at October Sale.

MUSKOGEE, OKL., Sept. 9.—(Special.)—Uncle Sam as a land auctioneer is attracting considerable attention in Oklahoma by an unique method of selling the real man's heritage in the form of good tillable land.

That the farmer and investor appreciate the plan and have confidence in it is demonstrated by the fact that within the last twelve months approximately \$1,000,000 has been paid for Indian land to the United States government through the United States Indian superintendent at Muskogee, Okl.

For several years the question of land titles in that part of Oklahoma formerly Indian Territory has not been looked upon favorably by those desiring investments. Land that will raise one bale of cotton to the acre, eighty bushels of corn season after season, better than 100 bushels of oats, two crops of potatoes in one season, averaging 100 bushels per acre, and adaptable to raising a corresponding crop of any of the staples, has gone begging and remained idle on account of the title bugaboo.

The same grade of land in Missouri, Illinois, Iowa, Kansas and the other agricultural states was bringing from \$5 to \$10 per acre, while the Indian lands in Oklahoma were taken by the weeds for the lack of purchasers at \$10 and \$15.

Within the last year, however, things have greatly changed. The government decided to sell the restricted lands for the sale of such lands. The Indian is as a rule inexperienced and in any business pertaining to his land such as renting or leasing, he has usually failed in getting the title cleared, hence the scare of poor titles.

How Titles Are Cleared. The plan of the government officials is to clear the lands of such clouds, appraise the land and improvements and offer the same to the highest bidder, thereby insuring perfect title, the deed being made in the office of the United States Indian superintendent.

The average acreage offered by the United States Indian superintendent is 3,000 and some months the list shows more than double that amount. The October sale now being advertised show 26,000 acres, a majority of which is susceptible to the highest state of cultivation and will raise

OMAHA THE MILLING CENTER

Flour Made Here at Rate of Three Thousand Barrels a Day.

BIG MILLS ARE KEPT BUSY

Home Consumption Makes Omaha a Strong Market for Wheat and More Comes Each Year—Output of Big Value.

Flour is now being manufactured in Omaha at the rate of 3,000 barrels a day, or 15,000 barrels a week. This involves the purchase of wheat to the amount of 13,500 bushels per day or 81,000 bushels a week.

The local flouring company, one branch of the local flouring industry, manufactures 1,000 barrels of flour a day; practically all the year round for the mill is run at capacity nearly all the time. To make this flour 4,500 bushels of wheat are ground daily.

The local flouring mill has a capacity of 2,000 barrels a day and has started operations at full tilt. About 9,000 bushels of wheat will be required for this.

Counting 300 working days to the year the local flour mills grind 900,000 barrels a year. This output is worth, of course, a great deal of money. Flour wholesales at a fluctuating price, but the average of \$2.50 per centum, or \$5 a barrel, is a fair one for purposes of computation. This means that the wholesale value of flour made in Omaha is \$4,500,000.

A Dangerous Wound. Served antiseptic by Buckner's Arnie, salve, the healing wonder for sores, burns, piles, eczema and all rheum. 25c. For sale by Boston Drug Co.

Big Band Goes With Boosters

Special Train to Be of All Steel Construction and of Highest Class.

NEW STAND AT CREIGHTON

Large Temporary Structure to Seat Between 3,000 and 4,000 Rooters at the Games.

Carpenters are busy erecting a temporary grandstand on the Creighton campus, preparatory to the football games of the fall season.

The figure will cover everything but meals, which will be served at the rate of \$2.50 a day for the four days of the trip in northeastern Nebraska.

The special train to be engaged will be of steel construction through and will include at least ten cars, electric lighted. The first coach will be a sixty-foot baggage dynamo car. A club car will be carried for an organization of twenty-four pieces.

Because of the demand two compartment cars containing ten apartments each have been ordered for the train. For this added luxury, a charge of \$3 is necessary. The trip will be October 25 to 28, inclusive.
