INDICATE BAD BLOOD

Where the blood is pure any wound or laceration of the fiesh heals "by first intention. V This is true because nature has provided a constituent to the circulation known as Plasma, which joins and holds the place together until the fibres and tissues can permanently knit and interweave. Whenever the ulcer becomes chronic it is because this healing quality of the blood has been impaired by some impurity in the circulation, and the place remains open, infecting all surrounding flesh, until the character of the circulation is changed. No sore can heal where the blood is bad; because the morbid impurities on which it thrives are constantly deposited into it by the burdened circulation. Cleanse the blood and the sore will heal of its own second, because then its very source and foundation will have been destroyed. S. S. S. cures Chronic Ulcers of every kind for the one great reason that it thoroughly purifies the blood. It goes into the circulation and removes every particle

of infectious or morbid matter, euriches the corpuscles, and assists nature in the formation of the necessary plasmic qualities of this vital fluid. No matter from

what source the impurities of the blood came, S. S. S. will remove them. Book on Sores and Ulcers and any medical advice free to all who write.
