FIRE DAY IN THE SCHOOLS IS

November Fourth Has Been Set Aside to Study Fires.

TEXT BOOK IS TO BE USED

Children Are Now Drilled Regularly in Getting Out of the Schools Without Disarder When Fire Gong Sounds.

November & has been set aside as Fire day in the public schools and the superintendent of instruction has ordered 500 copies of the booklet issued by the Pire commission of the state to be used by the teachers as a text book of instruction. The book contains fifteen lessons dealing with such subjects as carelessness with matches. coal oil lamps, kindling a fire, sparks, the ash heap and chimneys. The children are to be taught the importance of care in handling anything that has fire on it and on Fire day special observance will be

made in all the schools.

The school children of Omaha are drilled regularly in the proper way to leave the building when an alarm comes in and the principals are required to hold a drill at

least once a month.

No one but the principal knows when the alarm is given, whether it is a practice fire or a real one, and the intention is to get the teachers and pupils both so accustomed frequent alarms that there is little shance of confusion when the real occa-

The fire drills are not according to set sules, but are varied, and the superintendent makes every teacher realize that the idea is to preserve order above all and get the children out of the entrance that seems least likely to be blocked. The Collingwood disgster in Ohio was caused. according to Mr. Davidson's opinion, by the fact that the fire drill was a set pratice and the children were sent straight into been taught to get out.

Although order is the first consideration, some of the schools are so well trained that the building may be emptied in less than a migute, and the smaller annexes can be emptied in unity seconds. At Long school and some of the other larger schools the kindermarien willdren are lifted out of the first story windows by the larger

and fire wills have become so familia to the children now that they got up and file out without any thought of excitement when the gong rings. When a real fire breaks out they are expected to keep the ome order, and it is hoped that the habit will stick enough to seep them from panic.

SOME CLOTHES LOCK SHABBY TOO SOON

Few people take proper care of their clothen. They let them get shabby prematurely. They should send them to us occasionally for a scientific cleaning. It is wonderful how we put "new looks" into shabby clothes or clothes approaching shabbiness. Figured correctly it isn't an expense, either. Proper care of clothing makes it lest much longer, hence should be termed as economy.

We also make all kinds of alterations and repairs, put in new Hnings, put on silk or velvet collars and cuffs, new skirt braid and new bands, etc., at reasonable prices.
