

BIG HORN HAS BIG GROWTH

Wonderful Changes Wrought in Basin by Railroad.

SETTLED IT IN THREE YEARS

Valley in Vicinity of Powell, Wyo., Was Inhabited by Prairie Dogs and Coyotes a Short Time Ago.

Wonderful changes have been wrought in the Big Horn basin since the advent of the Burlington railroad, and especially during the last few years since the several irrigation projects have begun to bear fruit.

The progress made in the Big Horn basin during the last three years is remarkable when the present condition is compared with the unsettled condition of that country three years ago.

The progress made in the Big Horn basin during the last three years is remarkable when the present condition is compared with the unsettled condition of that country three years ago.

Oil Industry Thrives. At Cowley, where the new oil refinery is now in operation, and fine oil is being marketed along the Burlington lines in the northwest, there was nobody except the most venturesome prospectors that believed there was any oil in the country three years ago.

D. Clem Deaver of the Burlington home-seekers' information bureau said recently: "On the occasion of my last trip to the Big Horn Basin I visited the farm of J. M. Grant, two miles east of Powell, where I saw the best field of sugar beets that I have seen growing this year or any other year, without exception.

Oil Operators Active. The Sistraville, W. Va., crowd of oil operators have spent more than \$100,000 in this locality in developing natural gas and oil, and this company now controls sufficient land to give them a working basis for extensive operations.

Good Chance for Orchards. "There is no reason why these people should not be encouraged in setting out fruit trees," said Mr. Deaver. "The Basin country is practically the only country on the entire Burlington system where there are any apples to amount to anything this year.

The same general improvement is also shown at Manderson and Worland, where new buildings are going up on all sides of the towns and in the towns, and where the general air of prosperity prevails in the entire community.

Prof. Buffum's seed breeding farm is one of the wonders of the Big Horn basin. No person who is able to appreciate the work he is doing can visit his farm without becoming impressed with the great work which Prof. Buffum is doing for humanity as well as for his immediate locality.

The town of Thermopolis is also taking on new growth since the railroad began running trains there on June 15. The great spruce of this town are, of course, the greatest attraction there, but the town of Thermopolis is surrounded by unknown wealth, that only awaits the coming of new capital to develop the natural resources.

the Basin, and many eastern people are surprised to find that one of the stores there utilizes 30,000 square feet of floor space. The business done in this town is simply surprising to many of the emigrants who go to visit the Big Horn basin.

"In my experience I have never seen any locality develop as fast as, and along as rational lines, as the Big Horn basin," said Mr. Deaver. "There has been no wild-cat speculation of any kind. On the contrary, all of this progress has been made in a conservative and substantial manner, and this means much more for the future than

MAN'S PROWESS IN DANGER

Activities of a Merry Grass Widow Suddenly Heightened in Oklahoma.

Progressive matrimonial industry, hitherto monopolized by disreputable men, is threatened with invasion by woman. At least a start has been made, and not a bad one either. Some of the later-day bluebirds, peaceful and fascinating, have accumulated wives all the way from a pair to the top record of nine, with which they formed a string of domestic war stations along their routes.

Unmistakable Symptoms. "Yes," the old farmer was saying, "in some ways a Big is a good deal like a human critter. You may never have heard of it before, but a pig sometimes suffers from rheumatism, same as if he was a man."

HERE'S A NEW LINCOLN STORY

Vouched For as a Fresh One by Former Congressman from Minnesota.

Prof. James T. McClary of Mankato, Minn., who for fourteen years represented a district of his state in congress, told a new Lincoln story while in New York last week.

"A friend of mine out west who is now about 60 told me that when a boy he attended, with his father, one of the famous Lincoln-Douglas debates in Illinois," said Prof. McClary. "My friend's father was a Lincoln man, but the piece in which this particular debate took place was a Douglas stronghold.

"Douglas spoke first, and he was frequently interrupted by vociferous applause. The cheering and the hand-clapping at the end lasted four or five minutes. When Lincoln was introduced the crowd broke out into cheers for Douglas and kept it up for several minutes. Lincoln meanwhile waited patiently.

"When at length the enthusiasm had subsided Lincoln extended his long right arm for silence. When he had partly got this he said in an impressive tone: 'What an orator Judge Douglas is!'

"This unexpected tribute to their friend set the audience wild with enthusiasm. When this applause had run its course Lincoln, extending his hand again, this time obtained silence more easily.

"What a fine presence Judge Douglas had!" exclaimed the speaker earnestly. Again tumultuous applause followed the tribute. More and more excited the tall, gaunt lawyer got silence as he went on with admiring exclamations: "How well rounded his sentences are! How well chosen his language! How
