# Nebraska Her Great Crops and Wealth

Send these figures to your friends in the East. They will interest them.

The first railroad to build in Nebraska was the Union Pacific; that was in 1863.

Today the Union Pacific covers 3,411 miles of splendid roadbed, safeguarded by an automatic electric system of signals.

More than 26,000 freight and passenger cars and 1,000 monster locomotives are required to meet the public demands.

An army of men receives millions per year in wages.

Such activities are important factors in the building up of a State, and Nebraska needs prosperous railroads as the Union Pacific needs the support of the people of Nebraska.

We have a book on Nebraska and its resources which will be mailed to some friend in the East for the asking. Please send us his address.

Every Union Pacific ticket office is a bureau of railroad information.

Make your wants known there, or write to me.
