GRAIN AND PRODUCE MARKET

Wheat Market is Oversold and Develops Nothing New.

CORN MARKET RULES DULL

Offerings Are Very Light and Trading is Not Active and Will Continue to Be Slow Till New Crop Comes.

OMAHA, Nov. 1, 1910.

There is no new feature to the wheat situation despite the short rallies that occur, owing to the market becoming oversold.

Liverpool cables came lower again today, showing the weak foreign conditions. The world's visible supply increases and now shows an increase of 13,000,000 bushels over a year ago.

It is early yet to expect a movement of new corn and owing to the light receipts shorts become nervous and causes sharp advances.

The corn is certainly in the country and when the movement does start the pressure will undoubtedly be heavy.

Wheat continued to sag and values were heavy throughout the day. Shorts have little or no trouble in taking profits on sales, leaving the markets in as weak a position as before. Cash stuff ranged about ½c lower.

The corn market ruled dull and uninteresting with the exception of the strength shown in face of the weaker wheat values. Offerings are very light and trading is not active and will be slow with the movement of the new crop.

Primary wheat receipts were 754,000 bushels and shipments were 322,000 bushels, against receipts last year of 1,597,000 bushels and shipments of 571,000 bushels.

Primary corn receipts were 651,000 bushels and shipments were 1,368,000 bushels, against receipts last year of 464,000 bushels and shipments of 347,000 bushels.

Clearances were 21,000 bushels of corn, 5,000 bushels of oats and wheat and flour equal to 329,000 bushels.

Liverpool closed ¼d lower on wheat and ½d higher to ¼d lower on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Nov. 1.—Rains in the dry sections of Australia and the Argentine today were reported at about the same time as a big increase in the European visible supply of wheat. In consequence the market developed decided weakness, and closed with a net loss of 1¾@1¾c. Corn ruled steady, made up to ¼@½c off, oats ⅛@⅜c higher to ⅛c lower, and provisions unchanged to an advance of 2½@5c.

The only consolation on the bull side of the wheat pit at any time during the day came from light primary arrivals and from the strength of corn and oats. Supplies in and afloat for Europe were shown to have been enlarged nearly 3,000,000 bushels this week against a decrease of about the same amount a year ago. Unofficial estimates of the world's available supply, too, indicated an increase of 6,000,000 bushels. Cash wheat demand here was poor. What proved to be in the nature of a last straw was a report that mills in the northwest were shutting down. The December option ranged from 89¼c to 90⅝@90¾c and closed heavy at 89¼@89⅝c, a net loss of 1¾@1¾c.

Strength in corn was based on lightness of sales by farmers unsatisfactory husking returns, and the fact that the local contract stock was down to only 191,000 bushels in elevators. There were also reports of wet snow in parts of Iowa. December fluctuated between 46⅝@47c, closing steady at 46¾c, a net gain of a shade. The cash market was firm with No. 2 yellow at 50@50¼c.

There were more hedges coming off than going on in the oats pit. December varied from 31⅝c to 31¾c and finished at ⅛c off, at 31½@31¾c.

Provisions were firm. Last sales were unchanged to a nickel higher than last night.

The leading futures ranged as follows:

WEATHER IN THE GRAIN BELT

Indication is for Freezing Weather Tonight and Wednesday.

OMAHA, Nov. 1, 1910.

Areas of high pressure overlie the eastern and western portions of the country, with a trough of low pressure between, extending from the upper lakes southwest across the valleys to Texas. Threatening and unsettled weather attends the low pressure over the upper valleys and upper lakes, and generally clear weather prevails over the territory covered by the areas of high pressure. Temperatures are slightly higher everywhere east of the Rocky mountains, the rise being most marked in the upper Mississippi valley and upper lake region, where the weather is considerably warmer. Cooler weather, in the extreme northwest, accompanies the western area of high pressure, and the eastward movement of this high over the central valleys, will bring cooler weather to this vicinity tonight, and the outlook is favorable for a temperature of about freezing tonight, followed by continued cool Wednesday, with fair tonight and Wednesday.

Minimum temperature and precipitation compared with the last three years:

NEW YORK STOCKS AND BONDS

Almost Total Abandonment of More Active Operations.

DECLINE IN SALES OF U. S. STEEL

Holiday in Foreign Markets is Factor in the Intense Dullness and Neglect of Market Dealing.

NEW YORK, Nov. 1.—The stock market today reflected an almost total abandonment of the operations which have kept up an appearance of animation for some time and which have been attributed commonly to powerful private banking interests. There was a striking shrinkage in the total volume of the transactions, but what was most remarkable was the heavy decline in proportion of the dealings in United States steel.

Compared with a share equal to one-third of the total yesterday and for several days last week, United States steel accounted for barely one-sixth of the dealings today.

A factor in the intense dullness and neglect of the dealings was the holiday in foreign markets, the London and Paris stock exchages being both closed on account of All Saint's day, according to custom.

Cleveland, Cincinnati, Chicago & St. Louis stock was made the object of an unpleasant demonstration of the thinness of the market and of the indifference of the dealings. An order to execute the sale of a single hundred-share lot of the stock found the market bare of bids above 61, although sales were made yesterday at 71 and the bid at the closing last night was 69. The 100 shares were sold, therefore, at 61. Within half an hour another 100 shares were bought at 69 and there were sales late at 70. Carelessness in the execution of the order was claimed for the erratic course of the stock, rather than any development bearing on value. New York Central also was heavy during the morning.

A rise in the price of copper in London, an increase in October exports of the metal and a decrease in the European visible supply in the two weeks to November 1 were instrumental in raising the price of the copper industrials. There was a rise in the call money rate to 4¼ per cent, the highest for the fall season. The subtreasury withdrew cash from the banks again. Foreign exchange rates declined. Rates for time loans were very firm. The aggressive advance in Canadian Pacific to a record price at 202½ was a sustaining influence on the general list.

Bonds were steady. Total sales, par value, $1,994,000.

United States bonds were unchanged on call.
