Only a few bunches of cornfed beeves were included in the offerings and these were not of a particularly desirable character. In general the market for cornfed beeves is anywhere from 305940; lower than a week ago, while western range beeves are selling at prices ranging from nearly steady to 15620c lower than the close of last week. existed throughout the country and this is reflected in the reports from the principal industries and the leading cities.

Definite signs of improvement appear in iron and steel, although business from the railroads has not developed as quickly as usual at this season of the year. Further rail purchases involving a substantial tonnage, have been made for 1911 delivery, however, and other announcements are expected. Better reports are received from leading pig iron centers. Production of wiregoods this year is expected to equal previous records.

Progress is noted in special lines of cotton goods offered for spring and two or three instances are cited of full offerings being soid up and withdrawn. On the other hand the demand for print cloths and convertibles has failen off. Export trade is quiet. In men's wear there is an active demand for overcoalters for immediate delivery. Underwegt and nosiery lines are in moderately better request. A slightly improving demand is noted in yarns. Advances are announced on silk ribbons and silk piece goods for future delivery.
