## The One Player-Piano That Makes You a Musician

The Pianola is the one piano-player especially developed to make a musician-not a mere player-of everyone who buys it.

The majority of the people who buy piano-players are not trained in music. They must be shown-simply, clearly -just what musical effects are needed and how to obtain

Actually there is but one plano-player in the world which thus instructs those who use it.

This piano-player is the Pianola, of which PADEREWSKI says: "It is perfection;" and LESCHETIZKY (Paderewski's teacher) says: "It is the only plano-player deserving serious consideration from the musical world."

#### Exclusive Pianola Features

With any good piano-player you can execute the notes of a musical composition creditably. With the Planola alone can you express the far higher faculties of interpretation that denote the real muscian.

This is because the Pianola possess certain features, essential to artistic piano-playing, found on no other instrument whatsoever. Among these features are:

#### The Metrostyle

—the only device known which furnishes a positive guide to correct musicianly expression—which enables you to interpret every selection as the composer or some great artist would, or as your own musical ideas suggest.

The Graudated Accompaniment -which increases and de-creases the volume of ac-companiment with the flow of melody.

#### The Sustaining Pedal Device -which enables even the musical novice to make ar-

The Themodist

-which emphasizes the

melody or "theme" notes

clearly above the accom-

"singing" effect to

paniment, thus imparting a

music, characteristic of the

playing of the best musi-

Such world-wide celebrity has the Pianola attained that the tendency is growing to erroneously call all plano-players by its distinct, copyright name.

Not to be misled and to be certain of securing the instrument endorsed and preferred by the musical profession, the foremost musical educators and the great majority of the public both here and abroad, see that the word "Pianola" is actually on the instrument you buy.
