## Eat What You Will, Food Makes Not Fat

It is a mistaken theory that food makes fat. It is not the food you eat, but the way it is digested that makes fat. Your aystem produced digestive juices that turn good food into poor flesh and fat. Stop those juices from being made by your body and you step making fat. The faucous Marmola prescription which has created so much comment in our cities has been prepared in tablet form for the convenience of those who do not desire to take the liquid prescription. These little lablets, when they reach the stomach stop the luices from working the wrong way. They lets, when they reach the stomach stop the judges from working the wrong way. They renew these fluids and at once your food gives your hody just what it wants and only what it heeds. This is the secret of Marmola tablets. They will reduce the fat that is now on your person at the rate of from 12 to 15 owness a day and they will not cause you the least inconvenience or worry. Tou may sat early or late, you may sit still or run about it will not make any difference. Just put a tablet in your purse or your pockel, when you go out to a dimer. After each meal take one of the mal tablets and rest ansured that the limit will not harm you or make you between the seven children. The widow between the seven children. The widow

Direct Election of Senators Favored by Senate Committee

Resolution Authorizing Amendment to Constitution Will Be Reported-Strong Opposition to Measure.

WASHINGTON, Jan. 10-The senate committee on the judiciary today reached a decision to report favorably the sub-committee resolution authorizing an amendment to the constitution providing for the election of United States senators by direct vote of the people.

The controversy in the committee turned

upon the question as to whether the state or the federal government should supervise the elections. The sub-committee's report directs that the times, places and manner of holding the elections shall be prescribed by the state legislature. Senators Depew and Nelson both offered 1947,922 amendments giving congress the power to regulate, but the southern senators opposed these provisions as most prejudicial to the interests of their constituents. The two amendments were similar, but Mr. Depew's

While greatly encouraged at the progress made the advocates of the change, which would take the election of senators from January 18 and 19. the state legislatures and place them in the hands of the people, are by no means sanguine of immediate success. There is strong opposition in the senate to the provision and it is expected the measure will lie with this congress. Never before has a favorable report on a similar measure been received from the judiciary committee.

Other Prominent Educators Are on the Program, Which Has Many Interesting Phases-Study of Children.

Members of the State Home Economics association will meet at Lincoln January 18 and 19 in the home economics hall, University farm. A splendid program has been prepared for the occasion. The Home Economics association has

been attracting much attention since its organization, three years ago. Prior to that time, a meeting for women was held during the week of organized culture, known as women section of winter meetings. By special arrangement the program committee has secured Mrs. George Lawson Sheldon of Nehawka and Mrs. Harry

L. Keefe of Walthill to speak. In addition to the regularly published program, which appears in the combined program of organized agriculture, the committee takes this opportunity to notify the women of the state of these important additions to the program, which has been previously published. Both Mrs. Keefe and Mrs. Sheldon are women of unusual ability and wide experience in public work. Since the injunction was granted the case has to buy from a large number of western remained stationary. Wants to Settle Litigation.

As Mr. Dunn's term of office expires soon he wishes to get the litigation settled. Attorney Rich now has the offer of Mr. Dunn under advisement and a reply is anticipated within a few days.

Mr. Dunn has suggested that the entire earnings of the express company for that year he taken as the basis on which to arive at an amicable settlement.

By taking the entire earnings of the company and determining the intra state earnings, Mr. Dunn contends that the interstate earnings can be computed and in this way the value of the franchises of the company in the various states can be determined. Then it will be an easy matter to get at the bottom of the assessment differences, according to Mr. Dunn.

"Once the value of the franchises are determined, it will be an easy matter to regulate the assessment," said Mr. Dunn. 'When the express company's holdings were assessed at \$5,000,000, the foreign holdings were estimated at \$6,000,000. In fact, that was the amount the company was incorporated for. That would leave \$5,000,000 assessable property and that was the mount of the assessment. "The case has laid quiet so long that it
