never be successfully cropped. What the ranchmen said everyone in Montana said, for they thought the ranchmen knew. But the events of the last few years have proved that the ranchmen did not know. They were asleep and the leading agricultural papers only rocked them into a profounder slumber by telling them that they were right in saying that the bench lands of Montana could not be successfully

farmed. "Some men, however, had the courage to begin farming those lands, and they found

began, and what has it led to? It has furnished evidence that Montana is oging to lead all the states in the union in cereals; that it will hold a higher rank in the production of live stock than it has

ever held; that it will become one of the greatest sugar producing states in the union, and that it can at least hold its own against all the states that lie to the westward in the production of fruits not readily perishable.

Ranch Lands Tillable.

"Montana has fully 25,000,000 acres of illable bench lands which can produce rops on the dry land plan. That on these of Joel Brown-Muller, a rich farmer, filed bench lands more winter wheat and flax will be grown than are now grown in any other state in the union will soon be demonstrated by actual production. How can wheat is about thirty bushels per acre. Only 5,000,000 acres of the 25,000,000 acres at the low average for Montana of twents bushels per acre would mean 100,000,000 bushels of that cercal in a single year. As much as seventy-six bushels per acre have been reaped under dry land conditions, and acre when properly grown. Oone and onehalf million acres of bench lands devoted

to the growing of flax would send the production of flax away beyond that of North Dakota, which until recently produced more flax than all the rest of the some heat. He spied those brand new United States combined. Five acres of flax grown at Stanford in 1909 gave thirty bushels per acre

Live Stock to Increase,

That the production of live stock will he very ovident when it is remembered homored "slip-me-ons" over those gaudy that some day Montana will have 5,000,000 acres of land, not including the lands al-

ready referred to, under the ditch. These lands if all laid down to alfalfa would produce 39,000,000 tons, capable of feeding twice over all the live stock in Montana "Somewhere within a radius of 500 miles at the present without the aid of a single danced the light fantastic the night before, of Omaha there is a happy hobe, clad in acre of pasture.
