Fentures of the Trading and Closing Prices on Board of Trade.

CHICAGO, Feb. 7.—Democratic caucus approval of reciprocity was a reason, ac-

approval of reciprocity was a reason, according to some authorities, why all grains and provisions fell off in price here today. There was an unusually large trade in wheat, but the market was weak almost from start to finish. In wheat the constantly increasing volume of sales came chiefly from unloading by longs. A number of wealthy operators let go of considerable lines, some at a heavy loss. There was also much putting out of short wheat. Most of the day the Winnipeg markst was relatively strong, presumably in consequence of the reciprocity situation, but weakened after signs of demoralization had become pronounced here. Most of the day the Winnipeg markst was relatively strong presumably in consequence of the reciprocity situation, but weakened after signs of demoralization had become pronounced here. Northwestern exchanges this side of the international border were on the down grade. Poor trade in flour formed a bearish influence and so did lack of demand for cash wheat here and elsewhere. Feeling at the close was fairly steady, but latest figures were nearly the lowest of the session. May fluctuations ran from blue to 505c, with last sales 15615c off at 185,4944c.

Forthcoming Statement of United States Steel Corporation Expected to Show Gain Over Previous Two Months,

NEW YORK, Feb. 7.—At the close of an uncertain day on the Stock exchange, prices showed few important changes, from final quotations of the previous day. Heaviness of the metal stocks, accompanied by a sharp decline in copper prices in London, presumably was due to expect the understanding that production was to be curtailed.

The forthcoming statement of the United States Steel corporations January tonnage doubtless will show a gain over the previous two months, as indicated by the recent statement of Chairman Gary.
