He was conducting a question box and answering the question of why such different reports were given of the result of woman's voting in Colorado. This led to a consideration of those who had spread the statement that equal suffrage was not a success in the western states and in refuting it with emphatic statement and illustration of the good results from the woman's vote in his state.

Her voting there, he said, has resulted in direct benefit in the laws concerning women which the women have fostered and in the effect upon the women themselves.
