# BRANDEIS STORES

**DUNN WILL FORCE VIADUCT**  
 Gives Ultimatum to Great Western Road's Representative.

**MANDAMUS HEARING FRIDAY**  
 If Company Proceeds with Work Before First of March Case Will Not Be Pressed for the Present.

Unless the officials of the Mason City & Fort Dodge Railroad company, a subsidiary of the Chicago Great Western Railroad company, show Assistant City Attorney Dunn that they meant to begin construction work on the Nineteenth street viaduct before the first of March, Dunn will press the mandamus suit which is set for hearing Friday morning in Judge Treu's court.  
 The mandamus proceedings were instituted about two months ago and will come up for hearing Friday morning, unless attorneys of the company and Dunn agree. Attorney William Herdman, representing the company, was in conference with Dunn Tuesday morning. On behalf of the company, he promised to begin before the date set.  
 Willing to Be Shown.  
 "If you can convince me that the company means business and that it is going to build the viaduct, I will be willing to continue the mandamus proceedings or discontinue them. But in no case will it be necessary for the company to get their lumber and steel on the grounds and begin actual construction work," was the ultimatum put to Herdman.  
 The viaduct in question is the one which crosses Nineteenth street at Mason street. Seven years ago the railway company built a wooden viaduct, which was to be replaced in five years, under agreement with the city. It was to force the company to replace the temporary structure with a steel viaduct that the mandamus proceedings were started.

**PLEDGES ARE RECEIVED FOR THE Y. W. C. A. FUND**  
 Committee Decides to Do Nothing Spectacular in Its Campaign to Pay Off Debt.  
 Business men and women who are interested in the work of the Young Women's Christian association are pledged to give their effort to lifting the indebtedness of the association in as short a time as possible. That means that \$50,000 will be raised as quickly as this band of entitled workers can bring it about, but without any of the spectacular features of a "quick campaign." This was decided at a conference of the workers, which was held at the association Tuesday.  
 Mrs. Emma Byers, executive of the north central territory, arrives in Omaha Tuesday evening and will be consulted about further plans. The campaign, however, begins at once and pledges of assistance are acceptable at any time. Already several pledges have been secured.

**POLICE SEEKING JOSEPH KECK**  
 Want to Locate Him Because His Brother is Dead at St. Louis City.  
 The Omaha police are unable to locate Joseph Keck whose brother, Charles Keck, is dead in St. Louis city, according to a telegram received here yesterday from J. B. Richards, chief of police of that city. The body is being held in a morgue at that place, awaiting word as to its disposition from Joseph Keck, who is supposed to live in Omaha.  
 Foley Kidney Pills are a reliable remedy for backache, rheumatism and urinary irregularities. They are tonic in action, quick in results and afford a prompt relief from all kidney disorders. Sold by all druggists.

**Only Three Days Required**  
 To Cure the Drink Habit by the Neal Way. The Most Severe and Chronic Cases Are Completely Cured In That Time.

The Neal Three Day Liquor Cure is an absolute specific for periodical and habitual drunkenness. This is a strong statement, but it is justified by the experience of hundreds of patients who have left the various Neal institutes throughout the United States and Canada during the past year after only three days' treatment with all desire and craving for alcohol destroyed, and in a perfect mental and physical state. It makes no difference how long the patient has been drinking, or what he drinks, the cure is effected in three days' time, and without the use of painful hypodermic injections and injurious drugs. The Neal Institute is receiving daily enthusiastic reports from every quarter of the country, as to the efficacy of the treatment. That it does cure, and cure permanently, is established beyond controversy by the testimonials of hundreds of cured patients. For booklet "THE NEAL WAY", guarantee and bank references address the Neal Institute Company, O. B. 1502 So. 10th St., Omaha, Neb. Grand Island Institute, 1505 West Charles St.

 Corner 16th and Farnam Streets. Omaha, Neb.

**THE HUDSON '33' is the latest creation of Howard E. Coffin, master builder of automobiles, and chief of the Hudson's departments of engineering.**  
 Mr. Coffin has probably designed and built more successful, famous, motor cars than any other man the industry has thus far produced. Each succeeding design has been a marvel of its time.  
 His cars have at once become the standard for other manufacturers. Still, with this noteworthy success, Mr. Coffin has never produced a car that was a failure. So consistent has been his record for splendid achievement that it became natural for the trade to turn to his work as always the latest and most advanced step in automobile engineering. Mr. Coffin now devotes his time exclusively to the Hudson. His greatest work, we are told by competent critics, is found in the Hudson '33' which is described herein.

Many 1911 cars have been announced. With hardly an exception has there been any change from the previous year's models. "Perfection of details" is the common story told. But do you think that the year 1910 marked the perfection of the motor car?  
 The Hudson '33' stands out strongly, vividly in contrast. This car is different from anything ever produced. And yet the Hudson '33' upsets no principle of engineering. It complies absolutely, in every respect, with all proven successful practices of motor car construction.  
 It is simple, accessible, noiseless, powerful, staunch and, like all of Mr. Coffin's designs, is beautiful, luxurious and comfortable. Mr. Coffin has no pet theories. He builds his cars to meet actual requirements and usage on the road and in the simplicity of handling.  
 We believe that one is not properly equipped to select an automobile without first noting the progress that has been made in designing as exemplified in the Hudson.
