HEREDITARY BLOOD POISON

Scrofula is a disease manifested usually by a swelling and ulceration of the glands, especially about the neck. It is almost entirely hereditary in its origin, being the dregs or remains of some specific blood poison, Where the blood is greatly weakened with the scrofulous poison, the discase attacks other portions of the system besides the glands, and then we see its effects in weak eyes, poorly developed bodies, running sores and ulcers, skin diseases, aspecially on the scalp, catarrhal troubles, etc. Scrolula usually makes its appearance in childhood, though manhood or womanhood may be reached before the poison progresses to the stage of outward manifestation. S. S. S. is the one real cure for Scrofula. It is a blood purifier without an equal, and it cures this destructive blood poison by removing every trace of the infection from the circulation. S.S.S., in addition to

cleansing and purifying the blood, assists the stomach and digestive members in the creation of new blood corpuscles and other nourishing matter for the circu-

lation. S.S.S. increases the resistive powers of the system and by strengthening and building up the vitality, allows nature to make a perfect and lasting cure. Book describing the disease and any medical advice sent free to all who write. THE SWIFT SPECIFIC CO., Atlants, Go.
