tension promise as a counterbalance? The agreement places on the free list railway ties imported from Canada and to see to it that no one misunderstands be the headquarters city. materially reduces the duty on laths. shingles and planed lumber. Nebraska produces no lumber at all and as we must buy all the lumber we use from outside of the state any reduction in lumber prices ensuing should be of direct and measurable benefit.

also look for a measure of relief in

Lumber and lumber products are presumably our chief items of gain by this reciprocity, but there are at least two others worth considering. The agreement puts fish of all kinds on the free list, of which our imports from Canada to the United States are nearly \$5,000,000. A concession is likewise made on barbed fencing wire and galvanized iron or steel wire which should at least help steady the prices of these staples used in farming and stockraising and impress the farmer that the trade is by no means all one-sided If giving free lumber, for which the agricultural sections have long clamored in vain, brings relief from the high lumber prices and by competition pulls down other building materials and supplies, the benefits of reciprocity with Canada will be tangible even in Nebraska.

The Missouri Capital Fight.
