

## DUNDEE ELECTION IRREGULAR

Village Vote on Bond Issue Under Investigation.

### SOME VOTES NOT ON THE LIST

Agitation Over Request for Division of Precinct Arises, Involving the Dodge Street Saloon.

Scarcely had the excitement of the bond issue election in Dundee subsided when it was discovered that several on both sides of the question voted who were not entitled to vote. Probably as many as thirty who have lived in the precinct less than ninety days cast votes. However, these men might have voted without having changed the result of the election because the bond issue needed a two-thirds majority. Many names of voters have also been found that cannot be found upon the poll books. It is understood a quiet investigation is under way.

At the same time there is considerable agitation in the village over the request made to the county commissioners to divide Dundee precinct, making the village a separate precinct. It is said the purpose of this is that the saloon on Dodge street, closed the first of the year may be reopened.

Several of the prominent citizens of the village have discussed the matter and say they will resist the division to the finish.

## Dynamite and Oiled Sawdust Are Used to Confuse Witnesses

Teiser Brings Some Real Dynamite Into Court and Prof. Senter Will Test It.

After spending Wednesday in trying to confuse the testimony of the state's witnesses on their knowledge of dynamite with some oiled sawdust, John O. Teiser, attorney for the defense in the Erdman case, created a stir in court Thursday morning by substituting a small amount of the genuine and springing it as a surprise on several witnesses.

Presenting it in turn to Ralph Redcliffe and Robert Wharton, the two witnesses who, in company with the police, tested the dynamite found in the suitcase. Mr. Teiser asked if they would swear that it was dynamite. They stated that they wouldn't swear at all to the identity of the substance, but that they were almost positive that it was not dynamite. Mr. Teiser poured the substance out of its wrapper to the end of the stick upon a sheet of paper and laid it upon the table. He then addressed the court and asked permission to submit it to a dynamite test. The substance was turned over to Prof. H. A. Senter, who is at the head of the chemistry department in the high school. The whole proceeding was vehemently objected to by County Attorney English, who accused Mr. Teiser of "making a farce out of the suit in the court just to get in another spectacular play."

Ernest Brunko, Herman Meyers and Cecil Smith, residents of Louisville, testified to having seen the defendant in Louisville on either the 15th and 18th of May several days before the loaded suitcase was found on the porch of the Dennison home.

Gouzen is five feet six inches in height, weighs 126 pounds, and according to two policemen, has a "good life, a smile in each hand." Gouzen took offense at the whole world, so the policemen reported, and engaged with remarkable abandon in a combat with all the able bodied men in sight at the Harney street corner. They happened to be monthly policemen. The officers concluded their report of the affair with the note that no one was hurt.

## HIGH COST OF LIVING IS GOOD FOR ALL CONCERNED

Tradesman Tells Woman's Club American Made Products Are as Good as Any.

The high cost of living was commended by George Soucie, who spoke before the Household Economy department of the Woman's club Thursday morning. As best for both the purchaser and seller, "because it is more cheerful. It means higher wages for every one and that every one handles more money, and everybody feels better."

Mr. Soucie spoke to the club women about general merchandise and its purchase. His talk was chiefly a view of the way in which the American market is supplied with its materials and was distinctly in praise of "home products." The speaker's enthusiasm for American made goods extended even to the American goods which he found more to be admired than the more expensive imported models, as "more conservative in style and more suited to the women of this country."

Though he is himself a Frenchman, Mr. Soucie declared that in buying French hats and French gown Americans buy an expensive name and an article which has not greater beauty than its American contemporary. As a hint to the club women in their purchases, the tradesman said that nowadays the merchant and his representatives exercise great care in their purchase of the goods which they offer to the public because "no one gives her dollar for nothing and the merchants know they must give value received." He declared it is not true that the goods of American manufacture are adulterated. "Goods from reliable mills," he said, "may be counted upon as of good quality. The manufacturers know that it would not be to their advantage to attempt to adulterate. Expert buyers cannot be fooled."

## WANTS THE STREET PAVED

Special District Would Have to Be Created for Improvement of One Block.

John Latenser, architect, brought up an odd situation in the paving conditions of the special district in a talk with City Engineer Craig Thursday. According to Mr. Latenser an ordinance will have to be enacted especially to provide for the paving of one small block.

Thirty-third street, from Pacific street to a block north, is unpaved and stands as a barrier between the well paved district and the good streets leading to it. If this street were paved it would afford an excellent connecting link and would obviate the present necessity of traffic to the club going around over congested streets and car tracks to get to that point. The street is not in any paving district and therefore may not be improved except under a special order.

Mr. Craig said the legislature has measures under consideration which would give cities the right to take care of these connecting link streets.

## Chinese Villagers Burn Ruffian Band With Utmost Cruelty

Five Hundred Persons Penned in Village Which is Fired—Horrible Reprisal.

VICTORIA, B. C., March 2.—Rendored desperate by hunger, bands of hundreds of starving refugees are roving through the famine stricken area of China, plundering and killing, and a reign of terror prevails according to persons who arrived here on the steamer Tania Maru, which reached port from the orient today.

At Kun Shen, a walled village, within five miles of Shanghai, the villagers, after a desperate raid in which stores were looted and many killed, meted out punishment to the ruffian band. A band of more than 500 are reported to have been surrounded in a compound and hanged to death.

The refugees had taken possession of Kunshan and for two days ransacked the stores of everything eatable, killing or wounding all who resisted.

Many villagers were slain and others were taken prisoners and held for ransom. When the raiders moved on to plunder the next village the Kunshan people built a wall of war and offered to punish the fugitives. They came upon them in a small village and surrounded the houses. The gates were locked and the houses were fired. More than 500 perished in the holocaust. The refugees brought five prisoners into the compound in view of the villagers and threatened to kill them unless the siege was raised and an exchange of prisoners took place. The villagers, however, slowly hacked the five men to death. Thirty other prisoners were tied to stakes in the burning building and were burned with their captors.

## BODY OF EDWARD SMITH OF STANWOOD IS MISSING

Relatives of Man Who Died in Hospital at Muscatine Start Official Investigation.

MONTEVIDEO, Ia., March 2.—(Special.)—What has become of the body of Ed Smith of near Stanwood? That is the question relatives of Smith are asking and trying to answer by a search by a search that has proven to be without results. Smith is dead and buried. Of that they are certain, but that is practically all they know.

Smith was taken to a Muscatine hospital to be operated on for the removal of a carbuncle on his foot. During or following the operation he died. This information was not conveyed to the relatives, so it is claimed, until a week after Smith's body was buried, and then only after a relative had made inquiry to learn how he was getting along.

It was through Mrs. L. Doudelney, a sister of Smith's, that it was learned that Smith had died and been buried before the relatives knew of it. The letter she received informed her that Smith's wish had been that he be interred in the Fairport cemetery. Later developments show that such was not the case and it is alleged that now the authorities of the hospital claim that Smith was buried in Muscatine. Mrs. Doudelney does not put faith in this statement and has caused to be started an official investigation.

## Furniture for Comfort

If Napoleon could have reposed his tired limbs on one of the modern Davenports he undoubtedly would have acquired a habit of sleeping more than six hours a day and probably his fatigued brain would have had the rest and quiet necessary for making plans to turn the tide at Waterloo. True, in the days of the great Corsican there were couches and beds, but none of the comfortable designs of today, when the furniture maker has united in unique quantities, beauty of historic periods with ease, comfort and solidity of the Twentieth century. Davenports, just such as Napoleon would have owned had they then existed, are shown among the early spring offerings at this store. Sold under tag policy they assure quality, durability and price.

Listed here are only a few of the many Davenports in our large stock of modern and classical furniture.
