pamphlet form the expenditures from contingent funds by state officers, boards and ominissions during the years 1909 and 1910. These statements show that in many instances officers and members of boards or commissions paid tips to porters out of their contingent funds, slong with many other items to which the people of the state are objecting. These officers justify their action by the statement that they were in the employ of the state and while absent from Cheyenne they were on state susiness and it was not just to them to be expected to pay any of the items, no matter ow trivial, out of their own pockets.

Should the attorney general institute suit against ex-Treasurer Gillette for the reovery of state money spent as indicated it will probably open the whole question of expenditures of state money by officers and members of boards.
