Senate Names a Sifting Committee to Which All Measures Now in Hand Are Referred for

Action.

(From a Staff Correspondent.) DES MOINES, April 1 .- Evidence that the Iowa legislature is nearing the end was abundant today and the two houses had a great slaughter of bills. Late in the day the senate received and acted reports from about forty bills, indeft-

nitely postponing all of them. Then the senate named a sifting committee and everything was turned over to the members to be reported upon. About 250 bi'ls go to the committee. Monday this mittee will go to work bringing out bills and for the remainder of the session it wil direct all legislation. The last of the bills acted upon in

the senate today, a bill to abollah the offices of state printer and binder, was killed, 23 to 11. A bill to require air brakes on cars was passed by the senate. The house passed a bill for a gopher bounty, a bill amending the primary law and a bill to prevent fraud in jewelry. The house voted for the evening sessions next week, but may not select a sifting committee. While the tentative date for adjournment is fixed for April 2, it is not yet decided fully.

BARTOS SEES JOKER IN BILL Senator Declares Elevator Measure Has Sly Purpose.

(From a Staff Correspondent.) LINCOLN, April 1 .- (Special.) - Trouble is in store for the bill for the protection of farm elevator companies, which was in troduced by Senator Ollis and is now ready for a third reading. The bill ostensibly amends the section of the statutes which are drawn to "assure equal rights to all shippers," but in it Senator Cordeal, Senator Bartos and others have discovered what they believe to be attempts to force all shippers to send their grain through elevators and to prevent them from putting their grain directly into cars from their own wagons.

As the law is drawn now it has this clause, in Cobbey, section 1053: "And such railroad company shall supply cars to individuals shipping their own grain on equality with persons, associations or corporations owning, operating or controlling such elevators or engaged in the business of buying and shipping directly onto the

In the new law, however, this section is entirely omitted and as it is generally understood that the railroads and the

NEBRASKANS READY TO WORK

Representative Sloan of the Fourth disrict, who arrived in Washington this norning, coming in with Senator Crawford of South Dakota, said that he noticed a very considerable change in sentiment at some relative to Canallan reciprocity. Early in the year sentiment was very ronounced in favor of the agreementj negotlated with the Canadian commissioners

as the scope of the pact became better understood by farmers, they began to see new light and now many of them are outspoken in opposition to the measure which democrats will put through the house very early in the session.

Mr. Sloan says he will vote against the measure when it comes before the house on the ground that it attacks one of the fundamental principles of the republican party, namely, protection. He is a firm believer in reciprocity, but thinks the pact is entirely too one-sided to be supported by poration which desires sidings or trackage the ground that it attacks one of the facilities and cannot obtain them. The fundamental principles of the republican ommission is a court to adjust the claim party, namely, protection.
