CORN RECEIPTS ARE LIGHT

Few Cash Sales Made at Advance of Quarter Cent-Good Precipitation Reported Over Wide Western Area.

OMAHA, April 3, 1915. The weather map showed good precipita-ion scattered over both wheat belts which haures good seeding conditions in the pring wheat states and favorable growth in the winter wheat localities. There was an inclination on the part of shorts to cover later in the sension owing to the election day holiday tomorrow and most of the exchanges will be closed.

The unsettled weather and the unfavorable condition for delivery are keeping corn receipts light for the time, but a better movement is looked for. The market showed little independent strength, but uled firmer in sympathy with wheat, Cash

rade was not improved.

The wheat market was soft on bearish news and easier Liverpool cables. There was little strength shown and cash prices vere 1/2c lower. Corn held fairly steady, with a weak undertone. Receipts and offerings were light and the few cash sales were at 140 advance.
Primary wheat receipts were 551,000 bu.
and shipments were 210,000 bu., against receipts last year of 766,600 bu. and shipments Primary corn receipts were 503,000 bu, and ments were 330,000 bu., against receipts year of 496,000 bu. and shipments of

Prices on Board of Trade,

CHICAGO, April 2.—Widespread rain and anow acted like magic today in sending down the price of wheat. Crop prospects were believed to have been vastly improved by the timely moisture on fields millions of acres in extent. Weakness prevailed at the close, which was \$250 under Saturday's latest figures. The finish on corn varied from \$400 net gain to a shade loss, oats were 1-18c to \$400 under Saturday's latest figures. The finish on corn varied from \$400 net gain to a shade loss, oats were 1-18c to \$400 under Saturday's latest figures. The finish on covering by shorts, the handsome profits immediately in sight proving irresistible, with the election holiday tomorrow making delay a double risk. The rise was a sharp rally, but fresh selling on the part of several large speculators overturned the market worse than before. A contributing reason for the general weakness appeared in a decline at Liverpool, notwithstanding material decrease of the total stocks at that port. The market in the end showed only slight reaction from the bottom figures reached. The range for May extended from \$400 figures reached. The range for May extended from \$400 figures reached. NEW YORK, April 3.—COFFEE—Futures opened steady at unchanged prices to a decline of 4 points and ruled weak during the day, although trading was at no time active. Offerings were heaviest in the late session and the market closed weak at a net decline of light points. Part of the seiling was attributed to liquidation by recent buyers, who are supposed to have anticipated buil support following the valorization sale, whereas the leading buils seemed to be giving the market no ansistance during today's trading.

The decline was also accompanied by runiors that the valorization fellow had not been so successful as they appeared on the surface and there seemed to be an apprehension that the distribution of the government coffee will be attended by a further falling off in the demand for other supplies. influenced largely by conditions that were general rather than local. Supplies at this point were light enough to warrant strength and activity, but outside advices were bearish and any builtsh phases of local scope were ignored by tradars on the buying side of the market. As compared with Saturday's sales, bulk of offerings moved on a dime lower basis.

Orders in the hands of shippers were limited and speculative demand was also yery quiet from the opening. Movement was rather dull and it was well along toward midday before a complete clearance had been made. Some scattered business, mostly confined to bacon weights, was transacted early at 5610c declines, but larger droves showed the full reduction.

Butcher weight animals sold at or near \$0.25, this price buying offerings similar to those that sold at \$5.5 Saturday. Bacon grades commanded usual premiums over the ordinary run of stock, best lights topping at \$6.5 Hasvies moved at \$6.50 and less.

Orchard cultivation in accordance with the most approved western methods is to be attempted here this senson. The experiment of scientific cultivation is to be made for the purpose of determining whether the same methods so successful good in the Pacific coast states will not produce qually satisfactory results in lowa. The experiment is to be made on the orchard of W. S. Keeline, two miles east

of Council Bluffs.

Mr. Keeline is president of the National Horticultural congress, is a natural lover of the orchard and is a horticultural scientis who has progressed considerably beyond the kindergarten period, but he is going to relinquish all control of his fine orchard, consigning it wholly to the care of an expert horticulturist.
