

GRAIN AND PRODUCE MARKET

Wheat Flies Weak and Lower on the Bearish Report. WEATHER FAVORABLE TO CROP Cash Demand and Buying by Shorts Less Active, but Decrease in the Visible Supply is Sustaining Feature.

OMAHA, April 17, 1911. The sentiment was bearish throughout the day after the bullish tendency and sharp advance last week caused by the covering by shorts.

Weather over the entire country is clear and temperature favorable to good growing, but the increase in the visible supply has decreased demand and the buying by shorts is less active.

The grain market is dependent mostly on the country movement and the cash demand, that is a supply and demand basis.

Wheat ruled weak and lower throughout the day. News was bearish, with the exception of a grain market report from Chicago which stated the wheat had advanced 1/2 cent.

Corn followed the decline in wheat, but light receipts held the market in the face of high demand and slow trade.

Primary wheat receipts were 48,000 bu. and shipments were 53,000 bu. against receipts last week of 47,000 bu. and shipments of 54,000 bu.
