mittee for tabulation. Detention Hospital.

Alderman Beebs called attention to the very bad condition of the Detention hospital again, and said it was a good deal of a disgrace to the city and county. There are no inside tollets and people suffering from serious attacks of smallpox were obliged to go out in cold and stormy weather, often at great jeopardy of their lives. He said the roof was full of holes and leaking badly whenever there was rain. He said last week two men and one woman were detained there, and that if there had been another patient Custodian O'Grady would have had to house him in the barn that was last used for a glandered horse. The matter was referred to the committee on city property with instructions to ascertain the cost of the required mprovements.

Fire Chief Nicholson also called attention to some urgent repairs required to prevent the rear end of No. 4 fire station house from falling out. The house is a new pressed brick structure and the fact it so nuickly demanded repairs indicated organic weakness that excited some surprises. Alderman Beebe was instructed to report upon the matter after an inspection to be made today.

E. A. Wickham notified the council that he had partly completed the work of putting in a water main on Mill street which he is ready to pave, but that the water company refused to permit connection to be made with the smaller main that is the only source of supply. The matter was held up for a few days pending the decision of the condemnation court
