

# SATURDAY SUIT BARGAINS

Out of the High Rent District

The Store that Saves you Money

Join the procession of wise shoppers and come to THE PALACE CLOTHING CO. tomorrow and buy men's Suits, of unsurpassed style and quality at one-third less than you have to pay the merchants in high rent row.

## Clothing Specials Saturday

### Men's Pure Wool Suits

We offer for Saturday a large assortment of Men's high grade, hand tailored suits in latest spring styles. High renters ask \$12.50 to \$13.50 for the same garments— at \$9<sup>50</sup>

### Men's Business Suits

Splendid wool suits of fancy patterns of desirable colors, tailored to give wear, and satisfaction. Nothing neater or better in any store for less than \$10— at \$7<sup>50</sup>

### Men's High Art Clothes

A combination of quality and elegance that no tailor can beat. Fabrics are pure wool in very exclusive weaves and the tailoring is done by hand in the most careful, painstaking way possible; to equal them elsewhere you'd have to pay \$20.50, at \$12<sup>45</sup>

See these garments displayed in our most modern show windows.

### NOTED AVIATORS ARE COMING

Arrangements Being Made for Big Meet Here in May.

#### TO BE HELD AT THE SPEEDWAY

Bird Men Will Fly Over the City Each Day Before the Hour of the Meet to Attract the Crowds.

Negotiations are under way for what promises to be the most spectacular aviation meet Omaha has ever seen, to be held here the week beginning May 10 at the Speedway, J. D. Goldie, representing the famous Moisant International Aviators, incorporated, is in the city today and has laid his proposition before the officers of the club. The club has taken the matter under consideration and will return Goldie a definite answer on Monday. Goldie is optimistic over the outlook and says that assurances have been given him which make the proposed meet look certain. The staff of bird-men which will fly in Omaha has the same personnel as that which is now flying in the meet at Denver. It includes Simon, Barrier, Fyrie, Seymour and Staples.

Goldie is the director general of the recent big meet at Belmont Park, New York, the meet at Los Angeles besides which also was Paulhan's manager here. Alfred Moisant, the president of the company, is a brother of John B. Moisant, who fell to his death at New Orleans last fall.

It is proposed to advertise the meet by having one of the bird-men fly clear over the city every afternoon just before the events begin at 1 o'clock. Goldie guarantees to have the aviators fly all during the afternoon.

The aviators who are to fly are famous for some of the daring feats they have accomplished. Rene Simon, who is known as "the red flyer," does the "swoop and descent," a stunt said to be original with him and to have been accomplished by no one else. He was the aviator who made the observations at Juarez, Mexico, by which the insurrector camp was located after all the land scouts had failed.

Rene Barrier is an altitude flyer and was knighted by the king of Spain for his performances during a meet at Madrid. He won the Castle Moro prize at Havana.

Captain John J. Fyrie operates a bi-plane, while Simon operates a bi-riot monoplane. Fyrie is said to be the only Irish aviator and has won the nickname of "Ireland's Own."

### THOMAS HOPEFUL OF ESCAPE

Postmaster Says He Expects to Be Exonerated of any Wrongdoing.

"I am hopeful of being exonerated by the civil service commission of any wrongdoing in connection with my position as postmaster," said R. F. Thomas, postmaster, who returned from Washington at noon Friday. Mr. Thomas was called before the civil service commission and the Postoffice department at Washington about a week ago. He put his case before the two bodies and evidence from Omaha was also introduced at the hearing. Mr. Thomas said he had a pleasant visit, being glad to get back and having no fears of being found guilty of wrongdoing.

# SATURDAY SPECIAL

### KNIVES

The American Beauty pattern of heavy silver plated ware, fully guaranteed, is again offered in a series of Saturday sales in which the course of the spring months the complete set will be placed on sale, a piece at a time or several pieces at each sale. ### DEVELOPING CUT-OVER LANDS

Two Millions of Acres in Northwest to Be Devoted to Farming. TRACTS SOLD AT LOW PRICES. Plans Under Way to Prevent Country from Getting Into Hands of Speculators—Time Payment Allowed.

SPOKANE, Wash., April 20.—(Special).—Two million acres of cut-over lands in Spokane, Stevens and Pend Oreille counties in eastern Washington and Bonner, Kootenai and Latah counties in northern Idaho will be settled by colonists and developed as grain, hay, dairy and fruit farms during the next five years if the plans of the Logged-Off Land convention in Spokane are carried out. Representatives of the six counties will meet here on April 23 to work out the details of one of the most important movements yet started in the west.

Samuel Glasgow, chairman of the convention, which was called by Edwin T. Coman, president of the Spokane Chamber of Commerce, and attended by commissioners and officials of commercial clubs of the various counties, said in an interview that \$2,000,000 has been pledged by the several organizations to carry on the work.

"There are many prospective settlers in various parts of the United States who are under the impression there is no land available in this district, I have been informed that cut-over timber land can be bought as low as \$10 an acre, payable in ten yearly instalments. Forty acres cleared and cultivated will make a living for any family. Of course, there is a lot of hard work to do in getting the land in shape for crops; it is a job for full-blooded men, who are not afraid to take a few knock-knocks. This is not a land agent's scheme in any sense of the term, but a campaign to provide cheap lands for people in the congested centers of population. In many instances the state owns the land, the rest being held by timber companies, who have agreed to sell it at less than the original cost. We are now making plans to guard against speculators gaining control, and it is likely that the land will be sold only to bona fide settlers and farmers."

### THOUSAND DOLLARS FOR ROSE

Panama-California Exposition Management Offering Prize for Decorative Flower.

SAN DIEGO, Cal., April 20.—(Special).—One thousand dollars for a rose. That is the proposition of the Panama-California exposition directors, who want a new species of this popular flower, to be known as the "San Diego," and which will be used in profusion on the grounds of the exposition to 1915.

The offer will be extended to every florist in the United States through the San Diego Floral association, which will have charge of and be the final judge in the contest.

There are but three general restrictions. The first is that the rose must be hardy, so that it can be easily grown outdoors. The second is that the competitors must be residents of the United States, and the third is that they must make known their intention to compete to the San Diego Floral association.

### Making Chickens by Electricity in West

Incubator Operated with Lightning Current by Farmer in Washington.

SPOKANE, Wash., April 21.—Sixty-nine healthy chicks from a set of seventy-three eggs have just been hatched by electricity on J. Don Alexander's ranch at Reiter's Station, Wash., near Spokane. The initial test was so successful that 1,500 eggs will be placed in the incubators as soon as the apparatus can be installed. The equipment, which is not patented, can be attached to an ordinary oil-burning incubator at an expense of less than \$1.

Construction of the electrically operated incubator is simple. Mr. Alexander took the lamps from the oil-burning machines and wound German silver wire around the frames above the egg trays, connecting the coils with an incandescent light circuit. This is made through a contact device consisting of a piece of iron fixed on the regulator arm to dip into a small cup filled with mercury.

When the temperature in the incubator rises to 103 degrees, the natural hatching point, the iron arm is lifted automatically, shutting off the current until there is a fall of one-fourth degree. As a precaution against overheating in the event of failure of the controlling device, a piece of underwriter's fuse is placed in the circuit at the hottest part of the machine, thus shutting off the current at 166 degrees Fahrenheit.

### MAKE COLONIZATION RECORD

Railroads Carry Three Hundred Prospective Settlers a Week Into Northwest.

The Northwest Farmstead says: Never before in the history of the American northwest have people flocked into the country as they have during the last two weeks. Colonists are pouring into Portland, Spokane and other cities from practically every state east of the Rockies. It is estimated that over 2,000 homeseekers reached Washington and Oregon in a single week. This rush is due to the extensive advertising campaign that is being waged by various cities. Railroad men have provided transportation facilities for 300 colonists per week. Practically all of these people are coming with a view of establishing homes. This movement is going to mean much to the American northwest, because there is a great lack of farmers to develop the country's resources.

### WILL TRY AEROPLANE MODELS

Y. M. C. A. Class Students to Test Their Machines at Fort Omaha Ballroom.

The third trial of the aeroplane models constructed by the Young Men's Christian association class in aviation will be held Saturday afternoon at 2 o'clock at the ballroom at Fort Omaha.

A model constructed by Hugo Heyn has won at the two previous competitions. If he is successful at the meet Saturday he will be winner of the silver cup offered by the Nebraska Aero club.

Ten models will be entered in the competition to be held at Fort Omaha.

On another page will be found the rules governing the Booklovers' Contest.

### UTAH WILL DISPLAY FRUITS

State Proposes to Send Orchard Products in Omaha.

### "SHOW GETS RESULTS"—CAINE

Effects of Publicity Work Here Evidenced by Returns Seen in the West—Governor Spry is Enthusiastic.

SALT LAKE CITY, Utah, April 21.—(Special).—"Utah will make a better display at the second Omaha Land show than at the one held in January, as the change in dates will make it possible for us to send a fine display of our fruits," said Governor William Spry to General Manager W. O. Palaley of the exhibit. "I expect to be present and to take part in the Utah day exercises and that we will have a large attendance from our state on that occasion. We are all very much pleased with the movement to take the celebrated Tabernacle choir to Omaha for that occasion, as it will be a treat to your people and a great advertisement for Utah."

Governor Spry is most interested in the work done at Omaha, and is one of the foremost boosters for his state. He has the heartiest support of the commercial organizations of the state, and these will join with the executive in arranging for a display at the second land show.

The Utah Development league, which includes every commercial club in Utah, will take a leading part in the collection and handling of exhibits and the entire state will have a fine showing. Utah is one of the leading fruit states of the union, but on account of the first Omaha Land show coming in January, the exhibitors were not able to display anything in this line except apples. With the present outlook for a great fruit crop, it is thought that the display in October will be the most complete ever sent out of the state. A severe freeze last week threatened great damage, but later reports show but little loss. Fruit growers have equipped themselves with orchard heaters and were able to save the peach buds by using them, and the pear and apple buds had not developed far enough to be in danger.

"Utah has had splendid returns from her exhibits at the land show," said Secretary Joseph E. Caine of the Salt Lake City Commercial club, "but the men who attended the one at Omaha are those who have brought back the best reports. This is the logical place for people to come to when they leave the older sections of the west and we welcome them here in such a way as to make them wish to make their homes among us."

### NEW RULE ON CITRUS FRUIT

Board of Food and Drug Inspection Holds Aerial Coloration is Adulteration.

WASHINGTON, April 21.—In a decision filed today, the Board of Food and Drug inspection, headed by H. W. Wiley, held that green citrus fruits which have been artificially colored by holding in a warm, moist atmosphere for a short period of time, are under the operation of the food and drug act of June 30, 1906.

The section of the act applicable holds that an article of food is adulterated, "if it is mixed, colored, powdered, coated or stained in a manner whereby damage or inferiority is covered." The board states that green lemons artificially colored do not change in sugar or acid contents after removal from the tree and that the same oranges, if left on the tree, increase markedly in sugar and decrease in acid.

The board exempts from the operation of the decision certain varieties of oranges which attain maturity as to size, sweetness and acidity before the color changes from green to yellow, and the decision is not intended to interfere with the marketing of such varieties.

### RATES ON SHEEP ARE CUT

Cost of Transportation Between Winter and Summer Ranges is Reduced.

OGDEN, Utah, April 21.—As a result of efforts made by the Utah Wool Growers' association, the railroads have made a reduction of from \$5 to \$15 a car, effective about May 5, for shipping sheep from winter to summer ranges.

The cost of this service has heretofore been prohibitive, and made it necessary to drive flocks up and down the country over long and hard trails. In the old days this could be done to advantage, as the sheep could feed along the way on their 200-mile journey in the spring and fall.

Conditions now have changed, however, and land where the sheep ranged has been taken up by farmers and other settlers.

### PIANOLA RECITAL IS GIVEN

Program Rendered at Schmoller & Mueller Auditorium by H. E. Banister.

A pianola piano recital attended by several hundred guests was given at the Schmoller & Mueller auditorium Thursday night. Mr. H. E. Banister was at the piano, soprano solos were given by Mrs. S. J. Horton and a violin solo by William Hetherington. The Schmoller & Mueller Co. formerly gave these concerts in series and they were attended by many of the music loving people of Omaha. This spring they will be given at intervals of two or three weeks. The public is invited. Thursday night's program was:

- Mr. H. E. Banister at the piano piano.
- Marches: Hungary, Op. 10.....Kowalski
- Le Printemps (Spring).....Schubert
- Valses: No. 1.....Wieniawski
- The Spring Has Come.....Maud V. White
- Rhapsodia Hungary, No. 2.....List
- Nightingale.....List
- Traumzeitung.....Schumann
- Nocturne, Op. 9, No. 2.....Chopin
- Walse Op. 50, No. 3.....Chopin
- The Rosary.....Nevin
- Prelude, Op. No. 2.....Ramaninoff
- Rondo Capriccioso, Op. 15.....Mendelssohn

### A Bloody Affair

Is Lung Hemorrhage. Stop It and Cure Weak lungs, coughs and colds with Dr. King's New Discovery. 50c and \$1. For sale by Seaton Drug Co.

### A Sale for a Day

Miller, Stewart & Benton Co. announce a Lincoln Sale for Monday, April 24. Highest grade goods for to-be-wondered-at prices. If you attended our rug sale last Monday you know what to expect next Monday in Lincoln concessions.

### Smith is Guilty in White Slave Case

Jury in the Federal Court Finds Against Him on Two Counts.

After but twenty minutes of deliberation the jury in the Frank Smith case in the United States district court, brought in a verdict of guilty on two counts. The pronouncing of the sentence was postponed until Monday morning at 10 o'clock. The maximum penalty is ten years in the federal prison at Leavenworth, Kan., and no minimum.

Smith was indicted by the last federal grand jury for the transportation of women for immoral purposes, on thirteen counts. The government sought for conviction on the eleventh and thirteenth counts only, which were for the illegal transportation of girls under the age of 18 years.

It was alleged by the evidence introduced at the trial that Smith had brought one Eva Latham from Kansas City, Mo., to Omaha for immoral purposes. The testimony of the girl's mother was to the effect that the girl had been enticed away from her home. This, however, the girl refused to corroborate. All through the trial Eva Latham tried to shield Smith, but the evidence introduced by the government was too strong for her testimony to have any effect.

## Entire Apple Crop Eaten in Ten Days

The Northwest produced 15,000 cars in 1910. 600 boxes per car, 100 apples per box—means 900,000,000 apples. One apple a day to each inhabitant of the United States and the entire crop is eaten in 10 days. No wonder Idaho apple orchards pay \$200 to \$500 an acre and often \$1,000 and more.

## The Grandview Orchards

5 and 10 acre tracts \$175 and \$350 down—Balance small payments—No taxes.

An Orchard Developed for You by Men Who Know

THESE ARE THE MEN YOU WILL DEAL WITH.

### GUN MORE ESSENTIAL THAN CLOTHES TO HIM

Wyoming Rancher Pleads Habit and Necessity When Caught by the Police.

"Gun totin'" is as common in Cheyenne as wearing a hat. One of them, a Wyoming rancher, arrested for carrying concealed weapons.

"Fact is, I'd sooner be without my hat than my gun," added the prisoner as he was being booked.

Harper and W. G. Sullivan, 88 South Seventeenth street, arrested on the same charge, were fined \$1 each in police court on charges of vagrancy this morning. The law making the carrying of concealed weapons a felony went into effect Thursday, but charges under this law were not filed.
