and final sales were made at just and levels.
Shippers suported the market with orders that were reasonably large, but not very insistent. This class of buyers furnished an outlet for between 15 and 20 per cent of receipts, packers purchasing over 4,000 head in all. Usual spreads were preserved, but range was slightly narrower than last week, due to recent depression in bacon

week, due to recent depression in weights.

Butcher hogs moved around \$5.90 and best light animals reached \$6.05. Offerings of lard character sold at \$5.85 and less. These prices, as compared with those a week ago show declines of 5giloc, lights showing all of the dime reduction as a rule.

Sit SEr - Four loads of Mexican yearlings were received this morning, but they were sold by contract at \$5.19, so that the open market was practically void of business and remained quotably unchanged.

Unit yesterday the situation in the sheep barn this week has been generally satisfactory to selling interests. Good sixed runs on most day's cleared with a fair degree of freedom and some little improvement in prices, especially for high dressers, was registered. The big end of total receipts consisted of lambs, as has also been the case for six or eight weeks past, and toppy Mexican offerings were unusually plentiful.

Mexicans continue to bring premiums

and toppy Maxican offerings were unusually plentiful.

Mexicans continue to bring premiums over the ordinary run of westerns, of course, but yesterday's slumpy and indifferent trade, due to excessive week-end aupply, leaves prices on a rather vague basis. From top to bottom, present values for first class handy weight tambs range from a dime to 50c higher than quotations a week ago. Strictly chalce Maxicans sold as high as \$6.30 yesterday, a figure that may safely be placed at limit. Extra good Mexicans are closing around \$6.50. And westerns would have to be prime to command \$6.50. Spring lambs have been in light supply, but various sales indicate a range of \$6.00(19.00. Shorn lambs are selling all the way from \$4.25 to \$6.00.

No very broad changes can be quoted in mutton sheep for the reason that volume of business has been relatively small. As compared with last week's close the trade is steady to possibly a little stronger.

finish.
Quotations on sheep and lambs: Good to choice lambs, \$5.50g6.15; fair to good lambs, \$5.40g6.30; ahorn lambs, \$4.50g6.30; handy weight yearlings, \$4.75g5.16; heavy yearlings, \$4.40g4.65; fair to good to choice wethers, \$4.40g4.65; fair to good wethers, \$4.10g4.40; fair to good ewes, \$3.75g3.40; fair to good ewes, \$3.75g3.50.

**NEW YORK STOCKS AND BONDS** 

INDUSTRIAL WORLD GROWS BUSY Idle Money Piling Up and Sharp Competition to Find Employment for it Starts in the Finan-

cial Centers.

Dullness that Prevailed During Early

April Has About Vanished.

NEW YORK. April 12.—(Special Telegram.)—Duliness which has prevailed in the stock market during the early part of April vanished before improved trade conditions early in the week and more activity in trading was manifested toward the close of the exchange Saturday. The only change was expressed in a sudden rise in dally transactions Monday of 12.000 shates to nearly 600,7000 on Tuesday. Sales today were 212.725, which exceeds the Saturday record of some weeks past.

The sharp drop in prices after the rise of Tuesday induced some liquidation on the part of tired holders, but the volume was not as large as might naturally have been expected after the prolonged and weary duliness. The liquidation and the supporting orders that came into the market, together with the covering of short contracts, gave brokers a little more business which they certainly needed.

In the industrial world the steel and copper trade, while not active, has been that of a steady husiness sesson. Producers report more inquiry and larger sales of electrolytic copper on the lower price basis privilege for the last few days.

It is stated officially that the United States Steel corporation is operating about 70 per cent of its capacity at the present time, which means that about three furnaces have been banked. The corporation is shipping steel at the rate of between 5,000,000 and 10,000,000 tons a year, which compares with actual shipments of not much over 10,500,000 tons in 1910. About a chiese & Oble 45. 10 or N. J. g. 54. 12 cm. Lasther ha. 8 week's supply of pig iron is in stock.

In February and March the merchant furnaces in western Pennsylvania and centern Ohio reduced their stocks of iron.

The steel corporation is receiving new business at the rate of between 80,000 and 55,000 tons a day.

One of the leading industries of this season is the movement of citrus fruits and vegetables. The shipments from the West indies and Central American countries have been large and that from California has shown an everage good year.

on is the movement of citrus fruits and regetables. The shipments from the West ndles and Central American countries have been large had that from California has shown an everage good year.

Over 2,000 carloads of oranges have thus far this season been sent eastward from California. The coming year will, however, probably yield a larger output, because 2,000,000 new orange trees will contain to bearing next season, together with 500,000 lemon trees, making a total of 10,000,000 orange trees and 1,800,000 lemon trees in the southern California fruit crop.

What is really needed in the business world is the public participation in the stock exchange dealings and is the streat road to the revival of international trade and industrial activity, which would give to the railroads an increased volume of business sufficient to induce the taking back of men laid off this year, thus enlarging the number of active consumers; and, also to resume work of improvement and constructions abandoned after the late interstate commerce decision. This would inspire public confidence in the maintenance of dividends and its stimulating influence can hardly be overestimated. It is a true axiem that when the railroads are prosperous the country is prosperous. For that reason everybody will now hall a return of prosperity to the transportation interests as a great boon.

This will come with time, but unfortunately is is not in sight at the moment as slack trade is still evident.

Military incidents are frequently an excellent barometer of business and during the current week more than at any previous time this season, these reflect a low ebb of trade and industry. Idle money is piling up at all the great centers of the country, east and west, and there is sharp competition to find employment for it outside of regular business channels, where the demand is far below normal.

Chicago has been loaning six months money here at 3 per cent and buying long date commercial paper at 3½ per cent. These are unusually cheap rates for western capital at any time, but particularly at this season. Need in Business World. What is really needed in the business

Increased Bond Reserve. The stock market, which relapsed into

The rally which set in soon after 11 o'clock was very favorable, and when prices again gave way, few of the traders were ready. They adhered to their position. The market was weak in the first hour, the weakness being more pronounced in steel than elsewhere. Pressure was largely concentrated on that stock, while elsewhere there was little support. Selling of steel seemed to come from many sources and traders thought some of it was of good character. Brokers reported difficulty in finding bids for some of the inactive specialties. The market everywhere was thin.

thin.

Expectation was fulfilled by a large in-Expectation was fulfilled by a large increase in surplus bank reserves. The actual week-end bank statement reported is, 400,000 gain in cash, a figure much above the estimates. Loans were expanded only \$2,500,000 by the banks, and the surplus rose \$5,300,000. This is the largest increase since the second week of January; it brings the total surplus reserve to \$35,800,000. three times as large as a year ago this week, nearly four times as great as in 1908 and never exceeded in twelve years outside of 1908.

London Stock Market.

LONDON, April 22—American securities after a nominally higher opening on the Stock exchange here today drooped from lack of support and closed dull but steady. The 119,000,000 Seaboard Air Line bonds to be offered Monday were quoted at 40% per cent premium. duliness in the early part of the second hour today, after a little rally suffered a recurrence of weakness a little before the close; and activity increased on the decline as it has done in the earlier trading of the day.

The rally which set in soon after 11 colock was very favorable, and when prices again gave way, few of the traders were ready. They adhered to their position. The market was weak in the first hour, the weakness being more pronounced in steel than elsewhere. Pressure was largely concentrated on that stock with a lock of the second descent. Si 7-18 M. BY PRESTON C. ADAMS.

NEW YORK April 22.—(Repeatal to The Song of Son

One of the interesting developments in American transportation is the slow, but steady electrification of the steam railroads. All the big systems which enter New York are now using electricity so far as their terminal divisions are concerned and are gradually extending the zone of electricity run trains.

"The electrification of steam roads is as yet somewhat in the experimental stage."

Wheat.

"The electrification of steam roads is as yet somewhat in the experimental stage, a New Haven official is quoted as saying but within a year you will see the New Haven electrically equipped as far as New Haven, and possibly work started on the Boston end. Our engineers are now working on the question of the transportation of freight by electricity, with very good results. While the New Haven may not be showing any substantial reduction in operating coats between New York and Stamford by the use of electricity as compared with steam, the general results to date have more than justified the expenditure. I think there will be a wonderful progress made in the application of electricity to steam roads within the next few years, and this will show some rapid changes in the conduct of the railroad business of the country."

List of "Come-Ons."

changes in the conduct of the railroad business of the country."

List of "Come-Ons."

When the federal authorities raid questionable concarns engaged in the selling of mining and other stocks they frequently find lists containing thousands upon thousands of names and addresses. Surprise is sometimes expressed that such collections of possible dupes could have been gathered. Those familiar with the workings of the financial districts know fairly well how these lists come into being. There are men who make a regular business of supplying these "sucker" lists at so much per thousand. The names are collected in devious ways. Those who are ever induced to reply to any of the glaring advertisements of promoters are forever after registered as possible easy-marks and continue to receive the most amazing offers from swindlers.

One of the best lists in existence has been enriched by names supplied by a paper which makes a specialty of giving advice to investors. These names are vended, it is said, at 16 cents each, and the seller derives a nice little income therefrom. When one concern is forced out of business there is usually keen competition for its mail list. Thus the more energetic promoters can, in course of time, compile lists as long as their customers are short of sense.

Securities Float Easily.
