### A Gas Water Heater

connected to the kitchen boiler means

Real Economy  
Real Comfort  
Freedom from Care  
and  
Lots of Hot Water

#### BECAUSE

It gives all the heat to the water.  
It leaves the kitchen, or laundry, at a comfortably cool temperature for work.  
It saves you toiling over a hot coal fire, or around it.  
It prevents waste of heat—and money—because it is necessary to light the gas only a few minutes before you want hot water. Turn it off when you have enough hot water and the expense stops.  
Price, connected, \$10.00.  
Send for our representative who will explain the attractive terms we make.
